

Cisco CallManager Attendant Console Pilot Point Configuration

Cisco CallManager Attendant Console, a client-server application, allows you to use a graphical user interface containing speed-dial buttons and quick directory access to look up phone numbers, monitor line status, and direct calls. A receptionist or administrative assistant can use the attendant console to handle calls for a department or company, or another employee can use it to manage his own telephone calls.

For information and configuration procedures for Cisco CallManager Attendant Console, refer to the “[Cisco CallManager Attendant Console](#)” section in the *Cisco CallManager Features and Services Guide*.
