

Time Schedule Configuration

A time schedule comprises a group of time periods. Time schedules get assigned to partitions. Time schedules determine the partitions where calling devices search when they are attempting to complete a call during a particular time of day. For more detailed information on time schedules, refer to [“Time-of-Day Routing”](#) in the *Cisco Unified CallManager System Guide*.

Use the following topics to find, add, update, copy, or delete a time schedule:

- [Finding a Time Schedule, page 40-1](#)
- [Configuring a Time Schedule, page 40-2](#)
- [Deleting a Time Schedule, page 40-3](#)
- [Time Schedule Configuration Settings, page 40-4](#)

Finding a Time Schedule

Because you might have several time schedules in your network, Cisco Unified CallManager lets you locate specific time schedules by using specific criteria as the basis. Use the following procedure to locate time schedules.

Note

During your work in a browser session, Cisco Unified CallManager Administration retains your time schedule search preferences. If you navigate to other menu items and return to this menu item, Cisco Unified CallManager Administration retains your time schedule search preferences until you modify your search or close the browser.

Procedure

Step 1 Choose **Route Plan > Class of Control > Time Schedule**.

The Find and List Time Schedules window displays.

Step 2 From the drop-down list box, choose one of the following criteria:

- begins with
- contains
- ends with
- is exactly

- Step 3** Specify the appropriate search text, if applicable, and click **Find**. You can also specify how many items per page to display.

Note To find all time schedules that are registered in the database, click **Find** without entering any search text.

A list of discovered time schedules displays by

- Time schedule icon
- Time schedule name

Tip To search for time schedules within the search results, click the **Search Within Results** check box and enter your search criteria as described in this step.

Note You can delete multiple time schedules from the Find and List Time Schedules window by checking the check boxes next to the appropriate time schedules and clicking **Delete Selected**. You can choose all time schedules in the window by checking the check box in the matching records title bar and clicking **Delete Selected**.

- Step 4** From the list of records, click the time schedule that matches your search criteria.
The window displays the time schedule that you choose.

Additional Information

See the [“Related Topics” section on page 40-5](#).

Configuring a Time Schedule

The following procedure describes how to add a time schedule.

Procedure

- Step 1** In the menu bar, choose **Route Plan > Class of Control > Time Schedule**.
The Find and List Time Schedules window displays.
- Step 2** Perform one of the following tasks:
- To copy an existing time schedule, locate the appropriate time schedule as described in the [“Finding a Time Schedule” section on page 40-1](#). Click the **Copy** button next to the time schedule that you want to copy. The window displays the copy of the time schedule. Change the value in the Name field, and continue with [Step 3](#).
 - To add a new time schedule, click the **Add New** button and continue with [Step 3](#).
 - To update an existing time schedule, locate the appropriate time schedule as described in the [“Finding a Time Schedule” section on page 40-1](#), and continue with [Step 3](#).

- Step 3** Enter the appropriate settings as described in [Table 40-1](#).
- Step 4** Click **Save**.

Additional Information

See the [“Related Topics” section on page 40-5](#).

Deleting a Time Schedule

The following procedure describes how to delete a time schedule.

Before You Begin

You cannot delete time schedules that partitions are using. To find out which items are using the time schedule, click the **Dependency Records** link from the Time Schedule Configuration window. If the dependency records are not enabled for the system, the dependency records summary window displays a message. For more information about dependency records, see the [“Accessing Dependency Records” section on page A-2](#). If you try to delete a time schedule that is in use, Cisco Unified CallManager displays an error message. Before deleting a time schedule that is currently in use, you must perform either or both of the following tasks:

- Assign a different time schedule to any partitions that are using the time schedule that you want to delete. See the [“Configuring a Partition” section on page 41-2](#).
- Delete the partitions that are using the time schedule that you want to delete. See the [“Partition Configuration” chapter](#).

Procedure

-
- Step 1** In the menu bar, choose **Route Plan > Class of Control > Time Schedule**.
- Step 2** Locate the time schedule that you want to delete. See the [“Finding a Time Schedule” section on page 40-1](#).
- Step 3** Check the check box of the time schedule that you want to delete and click **Delete Selected**.
A message displays that states that you cannot undo this action.
- Step 4** To delete the time schedule, click **OK** or to cancel the deletion, click **Cancel**.

**Caution**

Before initiating this action, check carefully to ensure that you are deleting the correct time schedule. You cannot retrieve deleted time schedules. If a time schedule is accidentally deleted, you must rebuild it.

**Tip**

You can also delete a time schedule by locating and displaying the time schedule that you want to delete and clicking **Delete**.

Additional Information

See the “[Related Topics](#)” section on page 40-5.

Time Schedule Configuration Settings

[Table 40-1](#) describes the time schedule configuration settings.

Table 40-1 Time Schedule Configuration Settings

Field	Description
Time Schedule Information	
Name	Enter a name in the Name field. The name can comprise up to 50 alphanumeric characters and can contain any combination of spaces, periods (.), hyphens (-), and underscore characters (_). Ensure each time schedule name is unique to the plan. Note Use concise and descriptive names for your time schedules.
Time Period Information	
Available Time Periods	Choose a time period in the Available Time Periods list box and add it to the Selected Time Periods list box by clicking the down arrow button between the two list boxes. To add a range of time periods at once, click the first time period in the range; then, hold down the Shift key while clicking the last time period in the range. Click the down arrow button between the two list boxes to add the range of time periods. To add multiple time periods that are not contiguous, hold down the Control (Ctrl) key while clicking multiple time periods. Click the down arrow button between the two list boxes to add the chosen time periods.
Selected Time Periods	This list box lists the time periods that were selected for this time schedule. To remove a time period from the list of selected time periods, choose the time period to remove and click the up arrow between the two list boxes. Note If multiple time periods get associated to a time schedule and the time periods overlap, time periods with Day of Year settings take precedence over time periods with Day of Week settings. Example: If a Time Period configured for January 1st is configured as No Office Hours and another time period is configured for the same day of the week (for example, Sunday to Saturday) as 08:00 to 17:00, the time period for January 1st gets used. In this example, No Office Hours takes precedence. Note Time interval settings take precedence over No Office Hour settings for the same day of the year or day of the week. Example: One time period specifies for Saturday as No Office Hours. Another time period specifies Saturday hours of 08:00 to 12:00. In this example, the resulting time interval specifies 08:00 to 12:00 for Saturday.
