

License Capabilities Assignment Configuration

Capabilities Assignment allows system administrators to enable the Cisco Unified Presence Server (CUPS) and Cisco Unified Personal Communicator (CUPC) capabilities for users. You must ensure that licenses for CUPS and CUPC are available.

Make license capabilities assignments to existing users. Before you begin, ensure that users exist on your system by choosing **User Management > End User** and clicking **Find**.

Before you begin configuring the capabilities assignments for users, determine how many CUPS (servers and clients) and CUPC licenses are required for your system by choosing **Licensing > License Unit Calculator**. Acquire the required licenses by using **Licensing > License File Upload**. Verify the total licenses by using **Licensing > License Unit Report**.

Use the following topics to add or update a license capabilities assignment:

Finding a License Capabilities Assignment

Because you might have several license capabilities assignments for users in your network, Cisco Unified CallManager Administration lets you locate specific capabilities assignments on the basis of specific criteria. Use the following procedure to find locations.

Note

During your work in a browser session, Cisco Unified CallManager Administration retains your location search preferences. If you navigate to other menu items and return to this menu item, Cisco Unified CallManager Administration retains your location search preferences until you modify your search or close the browser.

Procedure

Step 1 Choose **System > Licensing > Capabilities Assignment**.

The Find and List Capabilities Assignment window displays. Use the two drop-down list boxes to search for a capabilities assignment.

Step 2 From the first Find capabilities assignment where drop-down list box, choose one of the following criteria:

- User ID
- Last Name
- Manager
- Department

From the second Find capabilities assignment where drop-down list box, choose one of the following criteria:

- begins with
- contains
- ends with
- is exactly
- is empty
- is not empty

Step 3 Specify the appropriate search text, if applicable, and click **Find**. You can also specify how many items per page to display.

Tip To find all locations that are registered in the database, click **Find** without entering any search text.

A list of discovered capabilities assignments displays by

- User ID
- Last Name
- Manager
- Department
- UPS Enabled
- UPC Enabled

Step 4 From the list of records, click the user name for whom you want to make capabilities assignments. The Capabilities Assignments Configuration window displays.

Additional Information

See the [“Related Topics” section on page 3-4](#).

Configuring the Capabilities Assignments for One User

This section describes how to add or update a capabilities assignment for a user to the Cisco Unified CallManager database.

Before You Begin

Before configuring a capabilities assignment, you must obtain licenses from Cisco Systems by using the License File Upload under the System menu.

Procedure

-
- Step 1** Choose **System > Licensing > Capabilities Assignment**.
The Find and List Capabilities Assignment window displays.
- Step 2** To add a new capabilities assignment or update an existing capabilities assignment, locate the appropriate capabilities assignment as described in the [“Finding a License Capabilities Assignment” section on page 3-1](#) and continue with **Step 3**.
The Capabilities Assignments Configuration window displays.
- Step 3** Check the appropriate check box as described in [Table 3-1](#).
- Step 4** To save the capabilities assignment information in the database, click **Save**.
-

Additional Information

See the [“Related Topics” section on page 3-4](#).

Configuring the Capabilities Assignments for Multiple Users

This section describes how to add or update capabilities assignments for multiple users to the Cisco Unified CallManager database.

Before You Begin

Before configuring a capabilities assignment, you must obtain licenses from Cisco Systems by using the License File Upload under the System menu.

Note Up to 250 users can be assigned licenses when using the Bulk Assignment capability.

Procedure

-
- Step 1** Choose **System > Licensing > Capabilities Assignment**.
The Find and List Capabilities Assignment window displays.
- Step 2** To add a new capabilities assignment or update an existing capabilities assignment, locate the appropriate capabilities assignment as described in the [“Finding a License Capabilities Assignment” section on page 3-1](#) and continue with **Step 3**.
- Step 3** To enable a new capabilities assignment or to update an existing capabilities assignment for multiple users, check the check boxes next to the users or click the **Select All** button.
- Step 4** Click the **Bulk Assignment** button.
The Capabilities Assignments Configuration window displays.

- Step 5** Check the appropriate check box as described in [Table 3-1](#).
- Step 6** To save the capabilities assignment information in the database, click **Save**.

Additional Information

See the “[Related Topics](#)” section on page 3-4.

License Capabilities Assignment Configuration Settings

[Table 3-1](#) describes the license capabilities assignment configuration settings. For related procedures, see the “[Related Topics](#)” section on page 3-4.

Table 3-1 License Capabilities Assignment Configuration Settings

| Field | Description |
|--|--|
| User Information | |
| User ID | Displays the name of the user for which you are enabling capabilities assignment. |
| Capabilities Assignment Information | |
| Enable UPS (Unified Presence Server) | To enable CUPS for this user, check the Enable UPS (Unified Presence Server) check box. |
| Enable UPC (Unified Personal Communicator) | To enable CUPC for this user, check the Enable UPC (Unified Personal Communicator) check box. You can enable both CUPS and CUPC; however, if you want CUPC, you must also enable CUPS. |
