

Generating Reports for Cisco Gateways

Reports for VG200 Gateways have a fixed format. You can generate a report for all VG200 Gateways or for a limited set of gateways.

Note The system does not make reports available for the Catalyst 6000 (FXS) gateway.

Generating Reports for Cisco Gateways

To generate a report for VG200 Gateways, use this procedure.

Procedure

Step 1 Choose **Bulk Administration > Gateways > Generate Gateway Reports**.

The Find and List Gateway window displays.

Step 2 From the Find Gateways Report where drop-down list box, choose one of the following options:

- Name
- Description
- DN/Route Pattern
- Calling Search Space
- Device Pool
- Device Type

Step 3 From the second Find Gateways Report where drop-down list box, choose one of the following criteria:

- begins with
- contains
- is exactly
- ends with
- is empty
- is not empty

Step 4 From the third drop-down list box, choose **Show** to display the associated endpoints.

Step 5 Specify the appropriate search text, if applicable.

**Tip**

To find all gateways that are registered in the database, click **Find** without entering any search text.

Step 6 To further define your query, you can choose **AND** or **OR** to add multiple filters and repeat steps [2](#) through [5](#).

Step 7 Click **Find**.

A list of discovered templates displays by:

- Device Name
- Description
- Device Pool
- Status
- IP address

Step 8 Click **Next** to choose details for your type of report. The Gateway Report Configuration window displays and shows the query that you chose. If you want to change the type of query, click **Back**.

Step 9 In the File Name field, enter your name for this report (required).

Step 10 Choose the file format from the drop-down list box.

Step 11 In the Job Information area, enter the Job description.

Step 12 Click the Run Immediately radio button to generate a report immediately or, click Run Later to generate reports at a later time.

Step 13 Click **Submit** to create a job for deleting assistants.

For more information on jobs, see the [Chapter 51, “Scheduling Jobs.”](#)

For information on log files, see [“BAT Log Files” section on page 54-3.](#)

You can search and download the report file using the Upload/Download Files option in the Bulk Administration menu. See [Chapter 2, “Uploading and Downloading Files.”](#)

Additional Information

See the [“Related Topics” section on page 46-3.](#)

Viewing Report Log Files

Cisco Unified CallManager Bulk Administration (BAT) generates log files for each report transaction and stores them on the first node of Cisco Unified CallManager server. You can find the link to log files for this job from the Job configuration window for this job. For more details, see [Chapter 51, “Scheduling Jobs.”](#)

Additional Information

See the [“Related Topics” section on page 46-3.](#)
