

# CHAPTER 25

## Music On Hold Settings

### Impacted GUI: Cisco Unified Communications Manager Business Edition 3000 Administrative Interface

The music on hold feature plays music to users when they are put on hold. Music on hold audio source files must meet the following specifications:

- 16-bit PCM .wav file
- Stereo or mono
- Sample rates of 48 kHz, 44.1 kHz, 32 kHz, 16 kHz, or 8 kHz

For information on tasks that are performed to set up music on hold, see the “Music On Hold” section on page 5-10

**Tip** Uploading a new audio source file replaces the current file on the system.

Table 25-1 describes the settings on the Music On Hold page where you can upload music on hold audio source files (**System Settings > Music On Hold**).

**Table 25-1      Settings on the Music On Hold Page**

Setting	Description
Uploaded Audio Source	This link displays the name of the music on hold file that is currently installed. The default file that is installed is Sample AudioSource. To listen to the audio source file, click the link and download the file to your desktop.
