# Installed Software Settings

The Installed Software page allows you to view the Optional Software Packages on your server. You can use the **Maintenance >Upgrade** page to install the Optional Software Packages that are required for your Cisco Unified Communications Manager Business Edition 3000 (Unified CMBE 3000) system.

Table 39-1 lists the name of the COP files and their respective naming conventions:

*Table 39-1*      *Lists the name of the COP files and their respective naming conventions:*

| File Type | Naming convention |
|---|---|
| CUCM Localization COP files | cm-locale-<>.cop |
| PO Localization COP files | po-locale-<>.cop |
| Device Pack COP file | cmterm-devicepack<>.cop |
| Common cmterm COP file | cmterm-<>.cop |
| CUCM Connection Pack COP files | cm-conp-CP-<>.cop |
| General cop files | ucos<>.cop |
| Genearl cop files | ciscocm<>.cop |
| CSA COP files | platform-csa-<>.cop |
| Country pack files | cm-locale-arabic_saudi_arabia_CP-8.6.1.9902-208.cop |

Table 39-2 describes the settings that are displayed on the Installed Software page (**Maintenance > Installed Software**).

*Table 39-2        Settings on the Installed Software Page*

| Setting | Description |
|---|---|
| **System Software** | **Active Version** refers to the latest installed Unified CMBE 3000 version on your system. |
| | **Inactive Version** refers to the previous version of the Unified CMBE 3000. The Inactive Version does not display if there is no previous version of the Unified CMBE 3000 available. |
| | **Note**    Both the Active and Inactive versions are available in read only mode. |
| **Optional Software Packages** | **Optional Software Packages** display the name and installation date of the installed the Optional Software Packages on your system. |
| | **Note**    By default, the optional software packages are sorted by their names. The Optional Software Packages can also be sorted by the installation date on your system. |
