## Introduction

- This Application Note uses the Cisco Catalyst 6608 T1/E1 voice gateway; however other Cisco voice gateways are also an option to use since Cisco Unified CallManager QSIG implementation does not depend on the physical interface. Centralized voicemail services rely heavily on the inter-PBX protocol used to connect remote PBXs to the “Message Center” PBX. In the scenario represented/tested by this document, QSIG protocol and the Additional Network Features (ANF) supported by each vendor’s PBX will determine the actual features supported by this solution.
- This document contains lab performance criteria that describes the interoperability of Cisco Unified CallManager Release 4.1(2) when used as a Message Center PINX in a QSIG private network with a Centralized Cisco Unity voicemail server using SCCP integration.
- The network topology diagram (Figure 1) shows the test setup for end-to-end interoperability with the Cisco Unified CallManager connected to a remote PINX via Catalyst 6608 T1/E1 blade port used as MGCP gateways configured as T1 ISO QSIG trunk, and a Cisco Unity used as a Centralized voicemail system using SCCP integration to the Message Center Cisco Unified CallManager.

## Network Topology

**Figure 1.** Network Topology

## Limitations

There are no known limitations with this feature.

## System Components

### Hardware Requirements

The following hardware is required:

- Cisco Catalyst 6500 switch with Cisco WS-X6608-T1 Module
- Cisco Unified CallManager 4.1(2) MCS server
- Cisco Unity 4.0(4) MCS server

## Software Requirements

The following software is required:

- Cisco Unified CallManager Release 4.1(2)
- Cisco Unity 4.0(4)

## Features

This section lists new and changed features and features that are not supported.

### Features Supported

- Station forward to personal greeting (busy/ring no answer/all calls)
- Reply to messages left in telephone answering mode
- Direct call
- Message Waiting Indication
- Support of Message Waiting indication on remote PINX stations is dependent on whether the PBX software used on the remote PINX supports QSIG MWI. Please refer to PBX manufacturer's technical documentation for further information. Also, refer to Cisco Interoperability Application Notes, found in the Cisco Interoperability portal, located at the following URL:  
[www.cisco.com/go/interoperability](http://www.cisco.com/go/interoperability)

### Features Not Supported

- None are known at this time.

## Configuration

This section contains configuration menus and commands and describes configuration sequences and tasks. The configuration examples shown in this document is an example to typical settings only. Note: Prior to configuring the "central" Definity G3 and Cisco Unified CallManager, the following should be installed and tested for proper functionality:

- Cisco Unity - Test for proper functionality of Cisco Unity voicemail server for local Cisco Unified CallManager users.
- Cisco Unified CallManager – Test for proper Q.SIG features transparency between Cisco Unified CallManager and remote PINX.

## Configuring the Cisco Unified CallManager

Configuring Cisco Unified CallManager for QSIG

1. Configure the QSIG-related system parameters
2. Configure the MGCP gateway
3. Configure the MWI Off/On directory numbers
4. Configure the Cisco Unity ports

Note: For detailed information on how to configure MGCP gateways connecting to specific manufacturers' PBX, refer to the proper application notes located in the Cisco Interoperability website, found at the following URL: [www.cisco.com/go/interoperability](http://www.cisco.com/go/interoperability)

## Configuring the Cisco Catalyst 6608 T1/E1 Voice Gateway

The following screen captures depict a typical configuration of a Cisco Catalyst 6608 T1 blade configured for QSIG functionality:

### Gateway Configuration

| Port Used for Fax Calls*                 | <input checked="" type="checkbox"/>      |

#### Fax and Modem Parameters

|                                       |                                     |
|---------------------------------------|-------------------------------------|
| Fax Relay Enable*                     | <input checked="" type="checkbox"/> |
| Fax Error Correction Mode Override*   | <input checked="" type="checkbox"/> |
| Maximum Fax Rate*                     | 14400bps                            |
| Fax Payload Size*                     | 20                                  |
| Non Standard Facilities Country Code* | 65535                               |
| Non Standard Facilities Vendor Code*  | 65535                               |
| Fax/Modem Packet Redundancy*          | <input type="checkbox"/>            |
| NSE Type*                             | Non-IOS Gateways                    |

#### Playout Delay Parameters

|                        |     |
|------------------------|-----|
| Initial Playout Delay* | 40  |
| Minimum Playout Delay* | 20  |
| Maximum Playout Delay* | 150 |

#### Echo Canceller Configuration

|                       |       |
|-----------------------|-------|
| Echo TailLength (ms)* | 32 ms |
| Minimum ERL (db)*     | 6 db  |

\* indicates required item

\*\* applicable to DMS-100 protocol only

\*\*\* applicable to DMS-100 protocol and DMS-250 protocol only

## Configuring Cisco Unified CallManager QSIG-related Service Parameters

The following screen captures show QSIG-related service parameters, as found on Cisco Unified CallManager 4.1(2) software:

| Clusterwide Parameters (Feature - Forward)              |                                     |                                |
|---|-------------------------------------|--------------------------------|
| Parameter Name  | Parameter Value                     | Suggested Value                |
| Forward Maximum Hop Count*                              | <input type="text" value="12"/>     | 12                             |
| Forward No Answer Timer (sec)*                          | <input type="text" value="12"/>     | 12                             |
| Max Forward Hops to DN*                                 | <input type="text" value="12"/>     | 12                             |
| Retain Forward Information*                             | <input type="text" value="False"/>  | False                          |
| Forward By Reroute Enabled*                             | <input type="text" value="True"/>   | False                          |
| Forward By Reroute T1 Timer (sec)*                      | <input type="text" value="10"/>     | 10                             |
| Include Original Called Info for Q.SIG Call Diversions* | <input type="text" value="Always"/> | Only after the first diversion |

#### Clusterwide Parameters (Feature - Path Replacement)

| Parameter Name                                   | Parameter Value                   | Suggested Value |
|--|-----------------------------------|-----------------|
| Path Replacement Enabled*                        | <input type="text" value="True"/> | False           |
| Path Replacement on Tromboned Calls*             | <input type="text" value="True"/> | True            |
| Start Path Replacement Minimum Delay Time (sec)* | <input type="text" value="0"/>    | 0               |
| Start Path Replacement Maximum Delay Time (sec)* | <input type="text" value="0"/>    | 0               |
| Path Replacement T1 Timer (sec)*                 | <input type="text" value="30"/>   | 30              |
| Path Replacement T2 Timer (sec)*                 | <input type="text" value="15"/>   | 15              |
| Path Replacement PINX ID                         | <input type="text" value="5555"/> |                 |

## Configuring Cisco Unity for Centralized Voicemail Services

Whether using Cisco Unity as a centralized voicemail server in a Q.SIG private network or to provide voicemail services to Cisco Unified CallManager users only, configure the platform as per the Cisco Unified CallManager 4.1 Integration Guide for Unity 4.0, found at the following URL: [http://www.cisco.com/en/US/products/sw/voicesw/ps2237/prod\\_configuration\\_guide09186a00802933d0.html](http://www.cisco.com/en/US/products/sw/voicesw/ps2237/prod_configuration_guide09186a00802933d0.html)

## Acronyms

| Acronym | Definitions   |
|---------|---|
| ANF-PR  | Additional Network Feature Path Replacement         |
| CUCM    | Cisco Unified Communication Manager                 |
| CCBS    | Call Completion to Busy Subscriber                  |
| CCNR    | Call Completion on No Reply                         |
| CFB     | Call Forwarding on Busy                             |
| CFNR    | Call Forwarding No Reply                            |
| CFU     | Call Forwarding Unconditional                       |
| CLIP    | Calling Line (Number) Identification Presentation   |
| CLIR    | Calling Line (Number) Identification Restriction    |
| CNIP    | Calling Name Identification Presentation            |
| CNIR    | Calling Name Identification Restriction             |
| COLP    | Connected Line (Number) Identification Presentation |
| COLR    | Connected Line (Number) Identification Restriction  |
| CONP    | Connected Name Identification Presentation          |
| CONR    | Connected Name Identification Restriction           |
| CT      | Call Transfer                                       |
| MWI     | Message Waiting Indicator                           |
| PSTN    | Public Switched Telephone Network                   |
