

# Accessing Voice Messages

To access voice messages, use the Messages button  (  ) > Messages.

**Note** Your company determines the voice message service that your phone system uses. For the most accurate and detailed information, refer to the documentation that came with your voice message service.

If you want to...	Then...
Set up and personalize your voice message service	Press  (  ) > Messages and follow the voice instructions. If a menu appears on your phone screen, choose an appropriate menu item.
Check for your new voice messages	Look for: <ul style="list-style-type: none"><li>A steady red light on your handset. (This indicator can vary. See <a href="#">Customizing Rings and Message Indicators, page 55</a>.)</li><li>A message waiting icon  and text message on your phone screen.</li></ul> <p><b>Note</b> The red light and message waiting icon display only when you have a message on your primary line, even if you receive voice messages on other lines.</p> <p>Listen for:<ul style="list-style-type: none"><li>A stutter tone from your handset, headset, or speakerphone when you place a call.</li></ul><p><b>Note</b> The stutter tone is line-specific. You hear it only when using the line with the waiting message.</p></p>
Listen to your voice messages or access the voice messages menu	Press  Depending on your voice message service, doing this either auto-dials the message service or provides a menu on your touchscreen.  When you connect to a voice message service, the line that has a voice message is selected by default. If more than one line has a voice mail, the first available line is selected. Ask your system administrator about options to connect to the voice message service all of the time on the primary line.
Send a call to a voice message system	Press iDivert. For more information, see <a href="#">Sending a Call to a Voice-Message System, page 28</a> .
