

Configuring MIB2 System Group in Cisco Unified Serviceability

Cisco Unified Serviceability allows you to configure the system contact and system location objects for the MIB-II system group. For example, you could enter Administrator, 555-121-6633, for the system contact and San Jose, Bldg 23, Second floor, for the system location.

- [Configuring the MIB2 System Group, page 9-1](#)

Configuring the MIB2 System Group

You can configure a system contact and system location for the MIB-II system group.

Tip

This procedure supports SNMP v1, v2c, and v3 configuration.

Procedure

- Step 1** Select **Snmp > SystemGroup > MIB2 System Group**.
- Step 2** Configure the MIB2 System Group settings, as described in the table below.

Table 9-1 MIB2 System Group Configuration Settings

Field	Description
Server	a. Select the server for which you want to configure contacts from the list box. b. Select Go .
System Contact	Enter a person to notify when problems occur.
System Location	Enter the location of the person that is identified as the system contact.
Apply To All Nodes	Check to apply the system configuration to all of the nodes in the cluster.

- Step 3** Select **Save**. A message indicates that changes will not take effect until you restart the SNMP master agent.

Step 4 Perform one of the following actions:

- a. Select **OK** to restart the SNMP master agent service.
- b. Select **Cancel** to continue the configuration without restarting the SNMP master agent.

Step 5 Perform one of the following actions:

- a. Select **Clear All** to clear the System Contact and System Location fields.
 - b. Select **Clear All** and **Save** to delete the system configuration.
-
