

About Integration of Cisco Unified MeetingPlace Express with Cisco Unified Personal Communicator

Revised: May 1, 2006, OL-6664-04

When Cisco Unified MeetingPlace Express is integrated with Cisco Unified Personal Communicator, users who are in a Cisco Unified Personal Communicator conversation can quickly share data through a private, reservationless, and web-only meeting that is provided by Cisco Unified MeetingPlace Express.

The following sections describe the integration between Cisco Unified MeetingPlace Express and Cisco Unified Personal Communicator:

- [About Web Meetings That Are Initiated From Cisco Unified Personal Communicator, page A-1](#)
- [How to Integrate With Cisco Unified Personal Communicator, page A-3](#)
- [Additional References for Integrating With Cisco Unified Personal Communicator, page A-4](#)

About Web Meetings That Are Initiated From Cisco Unified Personal Communicator

The following sections describe the web-only meetings that Cisco Unified MeetingPlace Express can provide for Cisco Unified Personal Communicator users:

- [About Joining Web Meetings That Are Initiated From Cisco Unified Personal Communicator, page A-2](#)
- [About Participant Privileges in Web Meetings That Are Initiated From Cisco Unified Personal Communicator, page A-2](#)
- [About Meeting Details for Web Meetings That Are Initiated From Cisco Unified Personal Communicator, page A-3](#)

About Joining Web Meetings That Are Initiated From Cisco Unified Personal Communicator

The following information applies to Cisco Unified MeetingPlace Express web-only meetings that are initiated from a Cisco Unified Personal Communicator conversation:

- The web meeting initiator must have an active user profile in one of the following places:
 - Cisco Unified MeetingPlace Express—See the [“About User Profiles” section on page 6-7](#).
 - The external directory that authenticates Cisco Unified MeetingPlace Express users—See the [“About User Authentication By an External Directory” section on page 5-14](#).
- Meeting passwords and e-mail notifications are not supported.
- The web meeting can be accessed only through the following means:
 - Automatic browser sublaunch by Cisco Unified Personal Communicator for all conversation participants; this occurs automatically when one conversation participant initiates a web meeting.
 - (For users who are not using Cisco Unified Personal Communicator) URL provided to, and subsequently distributed by, the conversation participant who initiates the web meeting.

These web meetings cannot be accessed by any other means, such as through the Find or Attend user web pages or through a Cisco Unified IP Phone screen when subscribed to the Cisco Unified MeetingPlace Express service for the Cisco Unified IP Phone.

About Participant Privileges in Web Meetings That Are Initiated From Cisco Unified Personal Communicator

The following information applies to Cisco Unified MeetingPlace Express web-only meetings that are initiated from a Cisco Unified Personal Communicator conversation:

- All participants are treated as guest users with presenter privileges in the web meeting room. Therefore, all participants can share data, and only the meeting initiator must have a Cisco Unified MeetingPlace Express user profile.
- Only one pod, the share pod, is available in the web meeting room. The participant list, chat, and note pods that appear in other types of Cisco Unified MeetingPlace Express web meeting rooms are not available.
- Except for the ability to share data, meeting participants do not have in-session controls, such as the ability to lock, record, or end the meeting from within the web meeting room.

- User profile settings do not affect the behavior of these web meetings. For example:
 - Even if the [Password required](#) field in the user profile is set to Yes, no passwords are required to attend web meetings that are initiated from Cisco Unified Personal Communicator.
 - Even though Cisco Unified MeetingPlace Express treats the meetings that are initiated from Cisco Unified Personal Communicator as private reservationless web meetings, the [Use reservationless](#) field may be set to No in the meeting initiator's Cisco Unified MeetingPlace Express user profile.
 - Even if the user profile [Host web meetings with](#) field is set to Participant list only, the user may still share data in web meetings that are initiated from Cisco Unified Personal Communicator.

About Meeting Details for Web Meetings That Are Initiated From Cisco Unified Personal Communicator

The following information applies to Cisco Unified MeetingPlace Express web-only meetings that are initiated from a Cisco Unified Personal Communicator conversation:

- The meeting subject that appears in reports is *userid_WEBONLY_MEETING*, where *userid* is the meeting initiator's [User ID](#) in the Cisco Unified MeetingPlace Express user profile.
- The number of ports reserved for the meeting is one more than the number of participants in the Cisco Unified Personal Communicator conversation.

How to Integrate With Cisco Unified Personal Communicator

This section describes the tasks that you need to complete in the Cisco Unified MeetingPlace Express Administration Center to enable web meetings to be initiated from Cisco Unified Personal Communicator.

1. Install enough web-conferencing licenses on Cisco Unified MeetingPlace Express to accommodate both the full web meetings that are initiated from Cisco Unified MeetingPlace Express and the share-only web meetings that are initiated from Cisco Unified Personal Communicator. See the following sections:
 - [About Web Ports](#), page 4-11
 - [About Licenses](#), page 13-8

2. Enable the Secure Sockets Layer (SSL) encryption technology on the Cisco Unified MeetingPlace Express system by obtaining and uploading the required certificates from a trusted certificate authority (CA). See the “[Managing Certificates for Cisco Unified MeetingPlace Express](#)” section on page 10-1.
3. Make sure that a Cisco Unified MeetingPlace Express user profile exists for each Cisco Unified Personal Communicator user that may initiate web meetings from a Cisco Unified Personal Communicator conversation.

Typically, both Cisco Unified MeetingPlace Express and Cisco Unified Personal Communicator are integrated with Cisco Unified CallManager, which handles the user authentication. See the “[About User Authentication By an External Directory](#)” section on page 5-14.

For additional tasks that must be performed outside the Cisco Unified MeetingPlace Express Administration Center, see the *Installation Guide for Cisco Unified Personal Communicator*.
