[messaging-gateway secondary](#)

messaging-gateway secondary

To specify a secondary messaging gateway, use the **messaging-gateway secondary** command in Cisco UMG endpoint configuration mode.

messaging-gateway secondary *location-id*

Syntax Description	<i>location-id</i>	Location ID of the secondary messaging gateway (range: 1-10 digits).
---------------------------	--------------------	--

Command Default	The default secondary messaging gateway is none.
------------------------	--

Command Modes	Cisco UMG endpoint configuration (config-endpoint)
----------------------	--

Command History	Cisco UMG Version	Modification
	1.0	This command was introduced.

Usage Guidelines	Use this command to provide failover support for <Abbreviation>Cisco Unity Express (all supported versions) and Cisco Unity endpoints.
-------------------------	--

 Note	Avaya Interchange endpoints rely on a DNS server for failover support.
---	--

Examples	The following example illustrates the use of the messaging-gateway secondary command.
-----------------	--

```
umg-1# config t
umg-1(config)# endpoint 5000 cue
umg-1(config-endpoint)# messaging-gateway secondary 20000
umg-1(config-endpoint)# end
umg-1(config)# end
umg-1# show endpoint local
A total of 1 local endpoint(s) have been found:

Location      Location          Endpoint      Endpoint      Primary      Secondary
ID           Prefix            Type         Status        Gateway     Gateway
-----
40000                  CUE          Offline      57000       50000

umg-1#
```

Related Commands

Command	Description
endpoint	Enters endpoint configuration mode to provision endpoints manually.
