email domain (network location id) enable (IMAP) enable (network location) enable (VoiceView Express) enabled (ccn application) enabled (ccn reporting historical) enabled (ccn reporting historical) enabled (ccn subsystem edbs dbprofile)–IVR Only enabled (ccn trigger http)–IVR Only enabled (ccn trigger jtapi) enabled (ccn trigger sip) erase startup-config exec-commands (aaa accounting event)

email domain (network location id)

To configure the e-mail domain for a voice-mail location, use the **email** command in Cisco Unity Express location configuration mode. To remove the e-mail domain for a location, use the **no** form of this command.

email domain {*name* | *ip-address*}

no email domain {*name* | *ip-address*}

Syntax Description	name	Configures the e-mail domain hostname for the location.
	ip-address	Configures the e-mail domain IP address for the location.
Defaults	No e-mail doma	in is configured.
Command Modes	Location config	uration
Command History	Cisco Unity Exp	ress Version Modification
	1.0	This command was introduced on the Cisco Unity Express network module and in Cisco Unified Communications Manager Express 3.0.
	1.1	This command was implemented on the advanced integration module (AIM) and in Cisco Unified Communications Manager 3.3(3).
	1.1.2	This command was implemented on the Cisco 2800 series and Cisco 3800 series routers.
Usage Guidelines	added when a V "4843000@myc Express system	configures the e-mail domain name or IP address for the location. The domain name is PIM message is sent to the remote location (for example, company.com"). If you do not configure a domain name or IP address, the Cisco Unity at this location cannot receive network messages. rm of this command removes the e-mail domain from the specified location.
	Λ	Ĩ
	Caution If you remove the e-mail domain for a remote network location, the system automatically disables networking from the Cisco Unity Express module to that location. If you remove the e-mail domain for the local location, then networking on that Cisco Un Express module is disabled. To reenable a location, assign it a valid e-mail domain.	

Examples

The following example configures the e-mail domain for network location 9 to 10.12.0.1.

```
se-10-0-0-0# config t
se-10-0-0-0(config)# network location id 9
se-10-0-0-0(config-location)# email domain 10.12.0.1
se-10-0-0-0(config-location)# end
se-10-0-0-0(config)#
```

Related Commands

Command	Description	
ccn application	Configures the CCN applications, such as voice mail and auto attendant.	
show call-agent	Displays the CCN application details.	

enable (IMAP)

To enable the integrated messaging (IMAP) feature system wide, use the **enable** command in Cisco Unity Express IMAP mode. To disable the IMAP feature, use the **no** or **default** form of this command.

enable

no enable

default enable

Syntax Description This command has no arguments or keywords.

Defaults IMAP is disabled.

Command Modes Cisco Unity Express IMAP

 Command History
 Cisco Unity Express Version
 Modification

 2.3
 This command was introduced.

Usage Guidelines This command is not available on the AIM.

Examples The following example enables the IMAP feature: se-10-0-0-0# config t

se-10-0-0-0# config t
se-10-0-0-0(config)# service imap
se-10-0-0-0(config-imap)# enable

Related Commands	Command	Description
	groupname	Assigns the IMAP feature to a group.
	session idletimeout (IMAP)	Specifies the number of seconds before the session terminates.
	service imap	Enters the IMAP configuration mode.
	session security	Specifies the type of security connection.
	show imap configuration	Displays configured IMAP parameters.
	show imap sessions	Displays active IMAP sessions.

ΕĮ

enable (network location)

To enable a network location to send and receive Cisco Unity Express voice mail messages, use the **enable** command in Cisco Unity Express location configuration mode. To disable the location, use the **no** form of this command.

enable

no enable

Syntax Description This command has no arguments or keywords.

Defaults Network locations are enabled.

Command Modes Cisco Unity Express location configuration

Command History	Cisco Unity Express Version	Modification
	2.1	This command was introduced.

Usage Guidelines Network locations are enabled by default to send and receive Cisco Unity Express voice mail messages. Use the **no enable** command to prevent communication to the location. Use the **enable** command to reestablish communication to the network location.

Note The no enable command does not erase the network location from the Cisco Unity Express database.

Examples

The following example displays the details for network location 15 with networking disabled:

```
se-10-0-0-0# config t
se-10-0-0(config)# network location id 15
se-10-0-0(config-location)# no enable
!!!WARNING!!!:Disabling location will disable
networking to/from this location.
Do you wish to continue[n]?:y
se-10-0-0(config-location)# end
se-10-0-0(config)# exit
se-10-0-0-0#
se-10-0-0-0# show network detail location id 15
Name:
                           houston
Abbreviation:
                           hou
Email domain:
                           how.cue.abcdef.com
Minimum extension length:
                           2
```

15

dynamic

4

Maximum extension length:

Phone prefix:

VPIM encoding:

Send spoken name:	enabled
Send vCard:	enabled
State:	disabled
VPIM broadcast ID:	vpim-broadcast
Sent msg count:	1
Received msg count:	1

The following example reestablishes voice-mail transmission to and from network location 15.

se-10-0-0-0# config t
se-10-0-0-0(config)# network location id 15
se-10-0-0-0(config-location)# enable
se-10-0-0-0(config-location)# end
se-10-0-0-0(config)# exit

Related Commands Command Description		Description
	network location	Specifies a network ID for a remote site.
	show network detail local	Displays details of a specified network location.

enable (VoiceView Express)

To enable the VoiceView Express feature, use the **enable** command in Cisco Unity Express VoiceView mode. To disable the VoiceView Express feature, use the **no** or **default** form of this command.

enable

no enable

default enable

Syntax Description This command has no arguments or keywords.

Defaults VoiceView Express is enabled.

Command Modes Cisco Unity Express VoiceView Express

Command History	Cisco Unity Express Version	Modification
	2.3	This command was introduced.
	3.0	This command was implemented on the advanced integration module (AIM).

Usage Guidelines This command is not available on the AIM for version 2.3 and earlier.

Examples The following example enables the VoiceView Express feature:

se-10-0-0-0# config t
se-10-0-0-0(config)# service voiceview
se-10-0-0-0(config-voiceview)# enable

Related Commands	Command	Description
	session idletimeout (VoiceView Express)	Specifies the number of seconds before the session terminates.
	service voiceview	Enters the VoiceView Express configuration mode.
	show voiceview configuration	Displays configured VoiceView Express parameters.
	show voiceview sessions	Displays active VoiceView Express sessions.

enabled (ccn application)

To start an application, use the **enabled** command in Cisco Unity Express CCN configuration application mode. To disable the application, use the **no** form of this command.

enabled

no enabled

Syntax Description	This command has no	arguments or keywords.
--------------------	---------------------	------------------------

Command Modes CCN configuration application

 Command History
 Cisco Unity Express Version
 Modification

 1.0
 This command was introduced on the Cisco Unity Express network module and in Cisco Unified Communications Manager Express 3.0.

 1.1
 This command was implemented on the advanced integration module (AIM) and in Cisco Unified Communications Manager 3.3(3).

 1.1.2
 This command was implemented on the Cisco 2800 series and Cisco 3800 series routers.

Examples

The following example enables the autoattendant application.

```
se-10-0-0-0# config t
se-10-0-0-0(config)# ccn application autoattendant
se-10-0-0-0(config-application)# enabled
se-10-0-0-0(config-application)# end
se-10-0-0-0(config)#
```

Related Commands	Command Description	
	ccn application	Configures the CCN applications, such as voice mail and auto attendant.
	show call-agent	Displays the CCN application details.

enabled (ccn reporting historical)

To enable the Cisco Unity Express IVR reporting historical database, use the **enabled** command in the Cisco Unity Express IVR reporting historical configuration mode. Use the **no** form of this command to disable the historical reporting database.

enabled

no enabled

Syntax Description	This command ha	s no arguments	or keywords.
--------------------	-----------------	----------------	--------------

Command Default The reporting historical database is enabled.

Command Modes Cisco Unity Express IVR reporting historical configuration

Command History	Cisco Unity Express Version	Modification
	3.0	This command was introduced.

Usage Guidelines The reporting historical database is enabled by default. If the reporting historical database is disabled, call-related events are not stored in the database.

Examples	The following example disables the Cisco Unity Express IVR reporting historical database:
	se-10-0-0-0# config t

se-10-0-0.(config)# ccn reporting historical se-10-0-0.(config-hrdm)# no enabled se-10-0-0.(config-hrdm)# end se-10-0-0.(config)# exit

Related Commands	Command	Description
	show ccn reporting historical	Displays the Cisco Unity Express IVR reporting historical database configuration settings.

enabled (ccn subsystem edbs dbprofile)-IVR Only

To enable the Cisco Unity Express IVR enterprise database system (EDBS) profile for use in the database steps for running scripts, use the **enabled** command in Cisco Unity Express IVR EDBS profile configuration mode. Use the **no** form of this command to disable the database.

no enabled Syntax Description This command has no arguments or keywords. Command Default The EDBS profile is enabled. Command Modes Cisco Unity Express IVR EDBS profile configuration		enabled	
Command Default The EDBS profile is enabled. Command Modes Cisco Unity Express IVR EDBS profile configuration		no enabled	
Command Modes Cisco Unity Express IVR EDBS profile configuration	Syntax Description	This command has no arguments	or keywords.
	Command Default	The EDBS profile is enabled.	
Command History Ciaco Unity Express Version Medification	Command Modes	Cisco Unity Express IVR EDBS	profile configuration
Command History Cisco Onity Express Version Mounication	Command History	Cisco Unity Express Version	Modification
3.0 This command was introduced.		3.0	This command was introduced.

Usage Guidelines After configuring the database profile parameters, use the **enabled** command to enable the Cisco Unity Express IVR EDBS profile for use with scripts.

Examples The following example disables the EDBS profile *mydbprofile* using the **no** form of the command: se-10-0-0# config t se-10-0-0(config)# ccn subsystem edbs dbprofile *mydbprofile* Adding new Database profile se-10-0-0(config-dbprof)# **no** enabled se-10-0-0(config-dbprof)# end se-10-0-0(config)# exit

Related Commands	Command	Description
	show ccn subsystem edbs dbprofile–IVR Only	Displays the Cisco Unity Express IVR EDBS configuration settings.

ΕĮ

enabled (ccn trigger http)-IVR Only

To enable the Cisco Unity Express IVR HTTP-based URL and application trigger, use the **enabled** command in Cisco Unity Express IVR HTTP trigger configuration mode. Use the **no** form of this command to disable the trigger from processing the incoming HTTP request.

enabled

no enabled

Command Default The HTTP-based trigger is enabled.

Command Modes Cisco Unity Express IVR HTTP trigger configuration

Command History	Cisco Unity Express Version	Modification
	3.0	This command was introduced.

Usage Guidelines After configuring the HTTP trigger parameters, use the **enabled** command to start processing incoming HTTP requests.

Examples	The following example enables an HTTP-based trigger application:		
	se-10-0-0-0# config t		
	<pre>se-10-0-0(config)# ccn trigger http urlname myhttpapp</pre>		
	Adding new trigger		
	<pre>se-10-0-0(config-trigger)# application myapplication</pre>		
	se-10-0-0(config-trigger)# enabled		
	se-10-0-0(config-trigger)# end		
	se-10-0-0(config)# exit		

Related Commands	Command	Description
	show ccn trigger http-IVR	Displays the trigger and application settings. Use the show ccn
	Only	trigger http command option to display the configured
		Cisco Unity Express IVR HTTP-based trigger settings.

enabled (ccn trigger jtapi)

To start a trigger, use the **enabled** command in Cisco Unity Express CCN configuration trigger mode. To disable the trigger, use the **no** form of this command.

enabled

no enabled

Syntax Description	This command	has no arguments	or keywords.
--------------------	--------------	------------------	--------------

Command Modes CCN configuration trigger mode

 Command History
 Cisco Unity Express Version
 Modification

 1.0
 This command was introduced on the Cisco Unity Express network module and in Cisco Unified Communications Manager Express 3.0.

 1.1
 This command was implemented on the advanced integration module (AIM) and in Cisco Unified Communications Manager 3.3(3).

 1.1.2
 This command was implemented on the Cisco 2800 series and Cisco 3800 series routers.

Examples

The following example enables the trigger 1234.

```
se-10-0-0-0# config t
se-10-0-0-0(config)# ccn trigger jtapi phonenumber 1234
se-10-0-0-0(config-trigger)# enabled
se-10-0-0-0(config-trigger)# end
se-10-0-0-0(config)#
```

Related Commands	Command	Description
	ccn trigger jtapi phonenumber	Enters trigger configuration mode.
	show ccn trigger all	Displays the CCN trigger details.

enabled (ccn trigger sip)

To start a trigger, use the **enabled** command in Cisco Unity Express CCN configuration trigger mode. To disable the trigger, use the **no** form of this command.

enabled

no enabled

Syntax Description	This command has no arguments or	keywords.
--------------------	----------------------------------	-----------

Command Modes	CCN configuration trigger	mode
---------------	---------------------------	------

Command History	Cisco Unity Express Version	Modification
	1.0	This command was introduced on the Cisco Unity Express network module and in Cisco Unified Communications Manager Express 3.0.
	1.1	This command was implemented on the advanced integration module (AIM) and in Cisco Unified Communications Manager 3.3(3).
	1.1.2	This command was implemented on the Cisco 2800 series and Cisco 3800 series routers.

Examples

OL-14012-07

The following example enables the trigger 1234.

```
se-10-0-0-0# config t
se-10-0-0-0(config)# ccn trigger sip phonenumber 1234
se-10-0-0-0(config-trigger)# enabled
se-10-0-0-0(config-trigger)# end
se-10-0-0-0(config)#
```

Related Commands	Command	Description
	ccn trigger sip phonenumber	Enters trigger configuration mode.
	show ccn trigger all	Displays the CCN trigger details.

erase startup-config

To erase the startup configuration, use the **erase startup-config** command in Cisco Unity Express EXEC mode.

erase startup-config

Syntax Description This command has no arguments or keywords.

Command Modes Cisco Unity Express EXEC

Command History	Cisco Unity Express Version	Modification
	1.0	This command was introduced on the Cisco Unity Express network module and in Cisco Unified Communications Manager Express 3.0.
	1.1	This command was implemented on the advanced integration module (AIM) and in Cisco Unified Communications Manager 3.3(3).
	1.1.2	This command was implemented on the Cisco 2800 series and Cisco 3800 series routers.

Examples The following example deletes the startup configuration from flash memory:

se-10-0-0-0# erase startup-config

Related Commands	Command	Description
	write	Copies the running configuration to the startup configuration.

exec-commands (aaa accounting event)

To enable or disable the logging of EXEC mode commands, use the **exec-commands** command in Cisco Unity Express AAA accounting event configuration mode. Use the **no** form of this command to disable the logging of EXEC mode commands. Use the **default** form of this command to restore the default setting (the logging of EXEC mode commands is enabled).

exec-commands

no exec-commands

default exec-commands

Syntax Description This command has no arguments or keywords.

Command Default The logging of EXEC mode commands is enabled.

Command Modes Cisco Unity Express AAA accounting event configuration (aaa-accounting-event)

Command History	Cisco Unity Express Version	Modification
	7.0	This command was introduced.

Usage Guidelines This command enables the logging of any Cisco Unity Express EXEC mode commands made using any interface except IMAP (CLI, GUI, TUI, and VVE).

 Examples
 The following example disables the logging of EXEC mode commands:

 se-10-0-0-0# config t
 se-10-0-0-0(config)# aaa accounting event

 se-10-0-0-0(config)# aaa accounting event
 se-10-0-0-0(config)# no exec-commands

Related Commands	Command	Description
	aaa accounting enable	Enables the recording of AAA accounting events.
	aaa accounting event	Enters AAA accounting submode and configures event filtering for accounting packets.
	show aaa accounting event	Shows the AAA accounting events that are designated to be logged.
