

# CHAPTER 6

## Configuring HWIC-D-9ESW Interfaces

This chapter provides instructions for configuring interfaces on the HWIC-D-9ESW card. Follow these steps to configure a pair of ports on two different switch modules as stacking partners.

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 1</b>	<b>enable</b>	Enables privileged EXEC mode. <ul style="list-style-type: none"><li>• Enter your password if prompted.</li></ul>
	<b>Example:</b> Router> <b>enable</b>	
<b>Step 2</b>	<b>configure terminal</b>	Enters global configuration mode.
	<b>Example:</b> Router# <b>configure terminal</b>	
<b>Step 3</b>	<b>interface fastethernet interface-id</b>	Specifies the port to configure and enters interface configuration mode. <ul style="list-style-type: none"><li>• Enter the interface number.</li></ul>
	<b>Example:</b> Router(config)# <b>interface fastethernet 0/3/1</b>	
<b>Step 4</b>	<b>no shutdown</b>	Activates the interface. <ul style="list-style-type: none"><li>• This step is required only if you shut down the interface.</li></ul>
	<b>Example:</b> Router(config-if)# <b>no shutdown</b>	
<b>Step 5</b>	<b>switchport stacking-partner interface fastethernet partner-interface-id</b>	Selects and configures the stacking partner port. <ul style="list-style-type: none"><li>• Enter the partner interface number.</li><li>• To restore the defaults, use the <b>no</b> form of this command.</li></ul>
	<b>Example:</b> Router(config-if)# <b>switchport stacking-partner interface FastEthernet partner-interface-id</b>	
<b>Step 6</b>	<b>exit</b>	Returns to privileged configuration mode.
	<b>Example:</b> Router(config-if)# <b>exit</b>	

	<b>Command or Action</b>	<b>Purpose</b>
<b>Step 7</b>	<b>interface gigabitethernet partner-interface-id</b>	Specifies the partner-interface, and enters interface configuration mode. <ul style="list-style-type: none"> <li>• Enter the partner interface number.</li> </ul> <p><b>Note</b> When you configure the FastEthernet port as a stacking partner, the corresponding GigabitEthernet interface is automatically configured as a stacking partner.</p>
<b>Step 8</b>	<b>no shutdown</b>	Activates the stacking partner interface.
<b>Step 9</b>	<b>end</b>	Exits configuration mode.

When you have completed the configuration, connect a crossover Ethernet cable from FastEthernet port 8 of the HWIC-D-9ESW card to the GigabitEthernet port that you want to use as a stacking partner.

For more information about how to configure other features on the HWIC-D-9ESW card, see [Chapter 5, “Configuring Layer 2 Interfaces.”](#)

**Note** Both stacking partner ports must have their **speed** and **duplex** parameters set to **auto**.

**Caution** If stacking is removed, stacked interfaces will go to **shutdown** state. Other nonstacked ports will be left unchanged.

**Note** For more detailed instructions on how to connect cables, see the *Cisco MWR 2941-DC Mobile Wireless Edge Router Hardware Installation Guide*.
