

NBAR2 Protocol Library

PB627831

Last Update: June, 2013

NBAR2 Protocol Library

NBAR2, or Network-Based Application Recognition, is a classification engine that recognizes and classifies a wide variety of protocols and applications, including web-based and other difficult-to-classify applications and protocols that use dynamic TCP/User Datagram Protocol (UDP) port assignments.

When NBAR2 recognizes and classifies a protocol or application, the network can be configured to apply the appropriate quality of service (QoS) for that application or traffic with that protocol.

The **match protocol** (NBAR2) command is used to classify traffic on the basis of protocols supported by NBAR2. NBAR2 is capable of classifying the following types of protocols:

- Non-TCP and non-UDP IP protocols.
- Statically assigned TCP and UDP port numbers.
- Dynamically assigned TCP and UDP port numbers. This kind of classification requires stateful inspection.
- Subport classification or classification based on deep packet inspection.

With IOS XE3.7 and IOS 15.2(4)M, NBAR started releasing monthly Protocol Packs for ISR-G2 and ASR1K routers. Customers can now get new protocols support by downloading protocol packs from CCO. Please refer to Protocol Pack FAQ for more details.

Table 1 lists the NBAR2-supported protocols available in Cisco IOS® and Cisco IOS XE Software, sorted by category. This table is updated when a protocol is added to a new Cisco IOS or Cisco IOS XE release train.

Table 1. NBAR2-Supported Protocols in Cisco IOS and Cisco IOS XE Software

Protocol/ Application	Cisco ASR1000 Series (Cisco IOS XE Release)	Cisco ISR-G2 (Cisco IOS T Train)	Category	Sub-category	Application -group	P2P Technology	Tunneled	Encrypted
flashmyspace	XE 3.1.0S - 15.0(1)S	15.2(1)T	browsing	rich-media- http-content	flash-group	n	n	n
flash-video	XE 3.1.0S - 15.0(1)S	15.2(1)T	browsing	rich-media- http-content	flash-group	n	n	n
flashyahoo	XE 3.1.0S - 15.0(1)S	15.2(1)T	browsing	rich-media- http-content	flash-group	n	n	n
gopher	XE 3.1.0S - 15.0(1)S	15.2(1)T	browsing	other	other	n	n	n
gss-http	XE 3.1.0S - 15.0(1)S	15.2(1)T	browsing	authentication -services	other	unassigned	unassigned	unassigned
http	XE 3.2.0S - 15.1(1)S	15.2(1)T	browsing	other	other	n	n	n
http-alt	XE 3.1.0S - 15.0(1)S	15.2(1)T	browsing	other	other	n	n	n
