Cisco Mobile Wireless Transport Manager 5.0 Ordering Guide

Cisco® Mobile Wireless Transport Manager (MWTM) is a feature-rich application that provides tools for troubleshooting, capacity planning, and inventory reports, and integrates with your OSS. These tools help to monitor and maintain network efficiency for your optimized mobile backhaul infrastructure, provided by the Cisco Radio Access Network (RAN) Optimization solution. Cisco MWTM is intuitive and allows you to easily navigate through the different management and troubleshooting tasks required to support your backhaul infrastructure. For more information, please visit: <http://www.cisco.com/go/mwtm>.

The Cisco Mobile Wireless Transport Manager comprises:

- **Media Kit Software CD**

This is the CD media for installing server and client software.

- **Node Right-To-Use (RTU) License**

This is a legal document that entitles the end user to manage Cisco MWR 1941 and Cisco 3845 Integrated Services Routers using Cisco MWTM up to the number of nodes purchased.

- **Standby Server RTU License**

This is a legal document that entitles the end user to install two Cisco MWTM servers in a redundant fashion.

- **Software Application Support (SAS)**

This provides software support and software upgrades for the Cisco MWTM. One SAS contract is needed per RTU license purchased.
