

Cisco Prime Infrastructure 1.1 Data Sheet

Wired and wireless networks are converging. IT teams need to be able to effectively manage all aspects of the wired and wireless networks as a unified platform.

Cisco Prime Infrastructure

Cisco Prime™ Infrastructure integrates Cisco Prime LAN Management Solution (LMS) and Cisco Prime Network Control System (NCS) to provide complete lifecycle management of converged wired and wireless networks with simplified ordering and license management through a single bundle.

Product Overview

The current release comprises two products that are packaged together for ease of ordering, positioning, and license simplification. The bundle consists of:

- [Cisco Prime Network Control System](#): Provides converged user and access management, complete wireless lifecycle management, and integrated configuration and monitoring of branch office routers
- [Cisco Prime LAN Management Solution](#): Delivers simplified management of Cisco® Borderless Networks and reduces operations costs by aligning network management functionality the way network operators do their jobs

Previously available individually, Cisco Prime NCS and Cisco Prime LMS can now only be ordered through the Cisco Prime Infrastructure Bundle.

Features and Benefits

By integrating both the products into a single bundle, customers can now experience an integrated solution with the following features and benefits:

- A bundled solution for complete wired and wireless lifecycle management
- Converged management for ease of monitoring, troubleshooting, and reporting
- Improved configuration, change and compliance management for lower total cost of ownership
- Similar look and feel for an improved user experience and workflow management

For detailed features and benefits on the individual products, please refer to the product pages referenced above.

About Cisco Prime Products

Cisco Prime for Enterprise is an innovative strategy and portfolio of management products that empower IT departments to more effectively manage their networks and the services they deliver. Cisco Prime is built upon a network services management foundation and a set of common attributes. It delivers an intuitive workflow-oriented user experience across Cisco architectures, technologies, and networks. Cisco Prime simplifies network management, improves operations efficiency, reduces errors, and makes the delivery of network services more predictable.

Licensing and Ordering Information

The Cisco Prime Infrastructure bundle includes Cisco Prime LMS and Cisco Prime NCS. Both these products are now only available through the Cisco Prime Infrastructure bundle.

Detailed ordering and licensing options for the Cisco Prime Infrastructure bundle are described in the Cisco Prime Infrastructure ordering guide located at <http://www.cisco.com/go/primeinfrastructure>.
