

At-A-Glance

3 Month Deferral for Unified Data Center

Acquire the technology you need today, and pay for it later!

Today's data center managers are faced with the arduous task of reducing expenses while increasing responsiveness. Cisco® establishes a new benchmark for performance with its Unified Data Center next-generation storage network- delivering more than three times the bandwidth of any Director in the industry - future-proofing storage connectivity while preserving current IT operations and knowledge.

The new MDS 9250i- industry's most reliable storage network - provides unmatched flexibility with its multi-protocol innovations unlike disparate solutions.

Cisco Capital® financing allows you to acquire Cisco solutions without a large upfront cash investment. We are helping to make it even easier and more affordable to secure the technology your business needs with no payments or interest for the first three months. Support your business' technology needs on your own terms and timeframe-not the ones dictated by your budget.

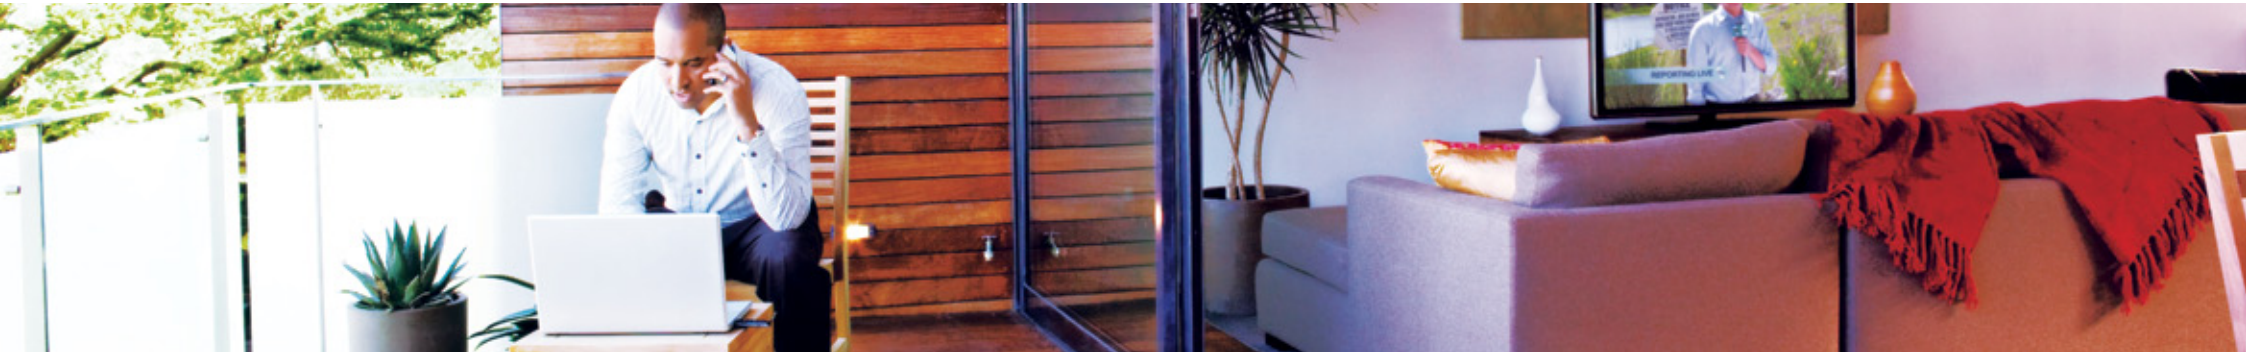

Offer Details*

Turn a large upfront investment into predictable monthly or periodic payments with this special offer:

- 3 months free from payments and interest
- 3 months included within term
