

Cistera *LMR*Record™ for Cisco IPICS

Quality Assurance and Compliance Systems

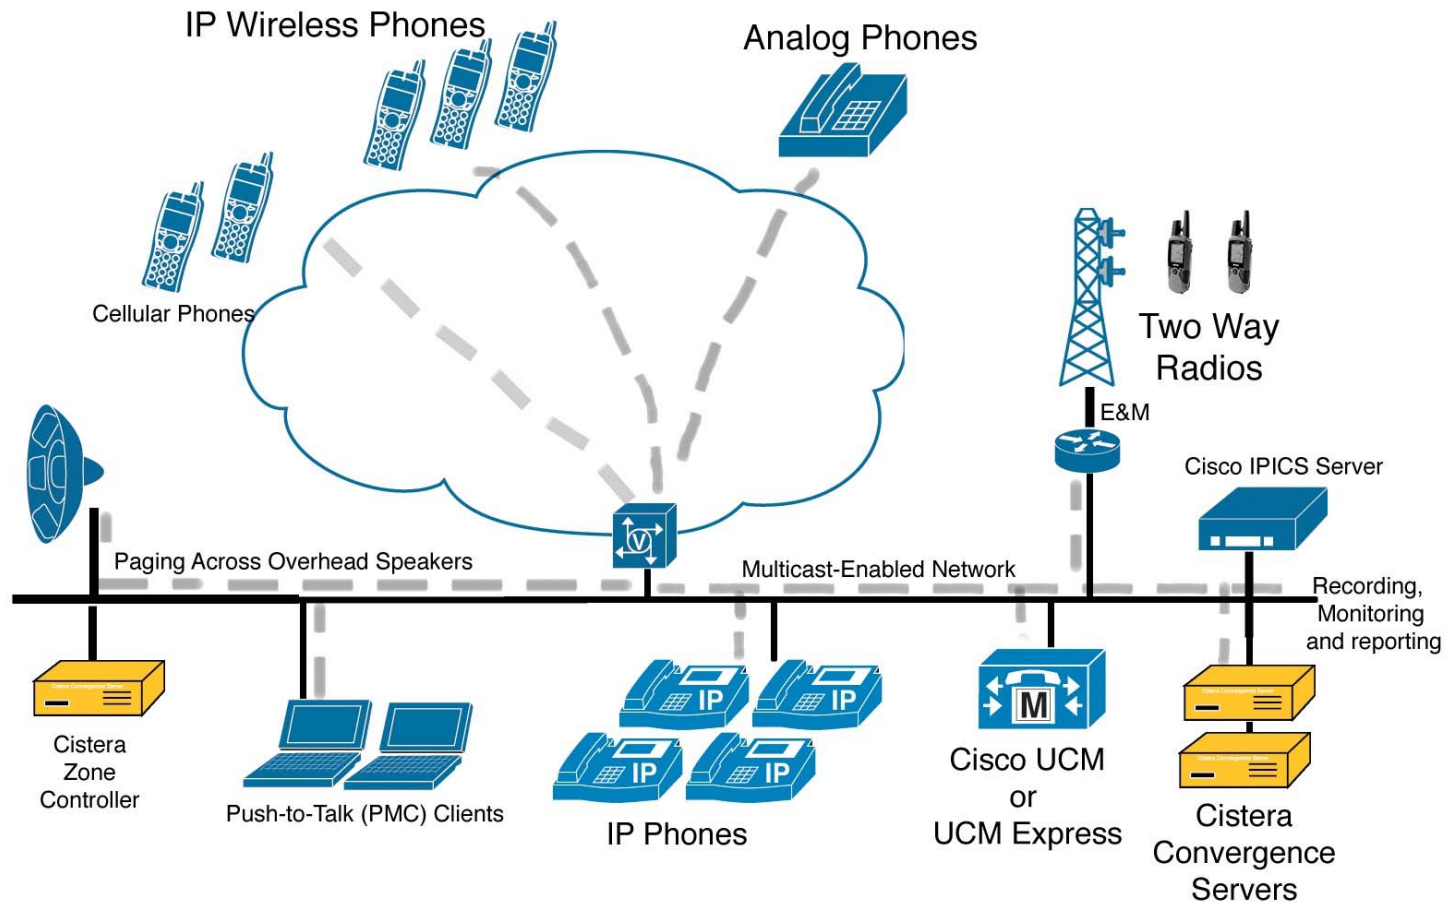

Delivered by Cistera Networks, a
Cisco Technology Development
Partner

Cistera *LMR*Record™ for Cisco IPICS

- Interoperable recording, monitoring and reporting
- Playback and retrieval capabilities enable a robust audit trail for quality assurance and compliance purposes
- Recording of any communications device connected to the IPICS network
- Designed specifically for Cisco IPICS environments

Cistera *LMRRecord*[™] for Cisco IPICS provides recording, monitoring and reporting for all communications devices

“Recording capability is now a must-have feature for all emergency communications. The added recording functionality of the Cisco IPICS solution really improves our workflow both during an emergency and after the fact – when we would need to provide a documented analysis of the event for quality assurance, legal and training purposes.”

Dennis Brodigan, Director of Emergency Services
for Matanuska-Susitna, Alaska
