

## Cisco Video Surveillance 2611 IP Dome

The Cisco® Video Surveillance 2611 Standard-Definition IP Dome is a feature-rich digital IP camera designed to provide superior performance in a wide variety of video surveillance applications. The camera employs H.264 compression of up to 30 frames per second (fps) at D1 NTSC resolution (720 x 480) or 25 fps at D1 PAL resolution (720 x 576), offering efficient network utilization while providing high-quality video. This flush-mount dome is designed to be deployed indoors. With its open, standards-based design, the camera provides an ideal platform for operation as an independent device or as part of a Cisco Video Surveillance network.

Figure 1 shows the Cisco Video Surveillance 2611 IP Dome.

**Figure 1.** Cisco Video Surveillance 2611 IP Dome

The Cisco Video Surveillance 2611 IP Dome offers a variety of benefits, including:

- **Optimal imaging efficiency.** The 2611 IP Dome can stream video using H.264 compression, reducing network traffic and storage requirements while providing superior image quality.
- **Motorized focus and zoom.** The lens on the 2611 IP Dome allows the focus and zoom to be controlled remotely, greatly simplifying installations and field of view adjustments.
- **Wide dynamic range.** The camera employs powerful digital imaging technology, allowing it to capture high-quality images in a wide variety of lighting conditions. It uses a progressive scan image sensor with global electronic shuttering to ensure natural color rendition, zero blooming and smear, and minimal motion blurring.
- **Dual streaming.** The camera can deliver two simultaneous video streams over the network. A combination of H.264, MPEG4, and MJPEG can be configured. Each video stream can be configured with individual resolution, quality, and frame rate settings.
- **Flexible power options.** The camera supports Power over Ethernet (PoE) 802.3af, and 12 VDC or 24 VAC power through an optional external power supply.
- **Mounting options.** The camera is designed for internal ceiling tile mount deployments. The camera is equipped with a varifocal motorized lens mounted to a manual pan and tilt mechanism that allows the camera to be rotated and placed at the proper angle.
- **Dome options.** The 2611 IP Dome comes standard with a smoked dome. A clear dome is available as an optional accessory.

- **Day/night operation.** The camera provides true day/night operation and includes an IR filter that switches to night mode in low-light scenes. This function can be set to manual or automatic control.
- **Embedded security and networking.** The camera provides 802.1X authentication and supports IP Multicast for enhanced bandwidth management.
- **Event notification.** The camera can examine designated areas in the video for motion activity and then notify users or other applications when it detects activity that exceeds a predefined threshold.
- **Bidirectional audio.\*** The camera supports full-duplex audio, and options for half-duplex operation.

**Note:** Features with an asterisk are not supported or applicable when the camera is used with Cisco Video Surveillance Manager.
