PRODUCT MIGRATION OPTIONS

The recommended replacement for the Cisco 10720 DPT uplink modules is the 10720 IEEE 802.17 RPR module equipped with the appropriate type of the pluggable OC48/STM16 optics. The RPR module is a dual mode card that can be configured in prestandard SRP mode or IEEE standard compliant 802.17 RPR mode. When configured in the SRP mode, this new module is functionally equivalent to the existing DPT modules. In addition, it provides the flexibility of pluggable optics, where a different reach type of optics can be used in each of the 2XOC48-STM16 ports.

Customers can use the Cisco Technology Migration Plan (TMP) to trade in products and receive credit toward the purchase of new Cisco equipment. For more information about Cisco TMP, go to: <http://www.cisco.com/go/tradein/>. The Cisco TMP application requires all users to have a Cisco.com user ID.
