

Cisco CRS Series 4-Port 10GE LAN/WAN-PHY Interface Module

The Cisco® CRS-1 Carrier Routing System is the industry's first carrier router offering continuous system operation, unprecedented service flexibility, and system longevity. The Cisco CRS-1 is powered by Cisco IOS® XR Software—a unique self-healing, distributed operating system. As part of a video-enabled IP Next-Generation Network (NGN), the Cisco CRS-1 Series delivers continuous, always-on operation that easily scales to support the massive bandwidth requirements of visual networking experiences such as high-definition IPTV and Cisco TelePresence. These services demand a platform that delivers predictable forwarding performance and efficient, intelligent, fabric-based multicast replication. The Cisco CRS-1 Series enables the Internet and NGNs to handle the approaching zettabyte era of carrier IP communications while protecting network investments for decades to come.

Product Overview

The Cisco CRS-1 Series 4-Port 10GE LAN/WAN-PHY Interface Module (Figure 1) provides four line-rate, IEEE 802.3-compliant 10 Gigabit Ethernet interfaces. Physical connections can be made using modular 10-Gbps Small Form-Factor Pluggable (XFP) pluggable optics.

This data sheet provides detailed product specifications for the Cisco CRS-1 Series 4-Port 10GE LAN/WAN-PHY Interface Module (4-10GBE-WL-XFP). For more information about the Cisco CRS Family or about other available interfaces, visit: <http://www.cisco.com/go/crs>.

Figure 1. Cisco CRS-1 4-Port 10GE LAN/WAN-PHY Interface Module

Features and Benefits

- Four line-rate 10 Gigabit Ethernet full-duplex interfaces
- Per-port flexibility for optical reach—selected using the appropriate XFP pluggable optical modules
- Compatibility with all Cisco CRS Series chassis
- Support for OIR (online insertion and removal) without the need to power down the chassis
- Simple configuration, monitoring, and maintenance

Cisco Services

Cisco Services make networks, applications, and the people who use them work better together.

Today, the network is a strategic platform in a world that demands better integration among people, information, and ideas. The network works better when services, together with products, create solutions aligned with business needs and opportunities.

The Cisco Lifecycle Services approach to services defines the requisite activities at each phase of the network lifecycle to help ensure service excellence. With a collaborative delivery methodology that joins the forces of Cisco, our skilled network of partners, and our customers, we achieve the best results.
