

## Model AT2300 3-Function Remote Control

### Description

The Model AT2300, 3-Function Remote Control features component buttons labeled for Cable, TV, and VCR. Pre-programmed A, B, and C buttons enhance control of the key navigational features of the interactive program guide within Scientific-Atlanta's Explorer® set-tops.

### Features

- Controls Scientific-Atlanta Explorer digital interactive set-tops and advanced analog set-tops, as well as other leading-brand cable or satellite set-top boxes
- Powers on and off the TV, VCR, and set-top box
- Provides the option to lock volume control to either the CBL, TV, or VCR mode, or to share volume control from mode to mode
- Retains special user settings in nonvolatile memory when batteries are changed
- Includes Bypass button to switch on and off the optional RF Bypass Module that attaches to Explorer set-tops
- Shares fast forward, rewind, pause, and play buttons between VCR and video-on-demand (VOD) operation
- Provides visual feedback of operating status with green LED
- Provides recessed area for promoting cable operator name and logo
- Includes batteries

### Specifications
