Multi-Stream CableCARD™ Module

Description

The Multi-Stream CableCARD™ module (M-Card™), when paired with a digital cable-ready TV, a digital set-top, or other OpenCable™ host devices, provides consumers with access to advanced digital cable services that would otherwise be protected by an embedded conditional access system.

Features

- Supports single stream and multistream hosts operating in one and two way modes
- Supported by Scientific Atlanta's Digital Network Control System
- Simultaneously decrypts up to six video streams
- Qualified by CableLabs®

Specifications

Refer to www.opencable.com and www.scte.org for more information on certifications and specifications.
