

# System Release 2.2 and System Release 3.2 Service Pack 2

## Description

Service Pack 2 for System Release (SR) 2.2 and SR 3.2 succeeds and carries forward all of the enhancements, features, and improvements of each previous system release and service pack. Service Pack 2 for SR 2.2 and SR 3.2 also includes some new features and enhancements that were implemented at the request of our customers. In addition, Service Pack 2 for SR 2.2 and SR 3.2 provides important enhancements to support content protection.

## Features

- **On the Cutting Edge: Support for Content Protection**—Service Pack 2 for SR 2.2 and SR 3.2 offers a copy protection feature that supports delivery of Copy Control Information (CCI) for both broadcast and on-demand content. CCI is delivered in the Entitlement Control Message (ECM) for the program and may be applied to any encrypted source. Digital Home Communications Terminals (DHCTs), PowerKEY® CableCARD™ modules, and OpenCable™ hosts that have content protection-enabled client software, use the program's CCI to determine how and when to apply copy protection.
- **Enhanced Video-on-Demand (VOD) Operation: Improved Bandwidth Management on QAM Modulators**—Service Pack 2 for SR 2.2 and SR 3.2 improves system bandwidth utilization and performance by looking at all of the available ports when allocating bandwidth on the QAM modulator.
- **Ensure Integrity of Your DBDS Data: Improved Backup and Restore Procedures**—Service Pack 2 for SR 2.2 and SR 3.2 offers an updated backup and restore procedure to make sure that you can safely and securely back up and restore your valuable Digital Broadband Delivery System (DBDS) data.
