- The 12-month hardware warranty provides 10-business-day advance replacement.
- Customer are eligible for 12 months of Small Business Support Center technical phone support. Small Business Support Center technical support provides only basic steps to identify the phone's hardware state for return materials authorization (RMA).

Q. Does the Cisco SPA504G have a message-waiting indicator LED?

A. Yes.

Q. Does the Cisco SPA504G work with instant messaging applications?

A. No.

Q. Does the Cisco SPA504G support syslog?

A. Yes.

Q. What and how many ring tones does the Cisco SPA504G support?

A. The SPA504G supports 10 built-in and 2 customizable ring tones. The customizable ring tones can be downloaded using the web GUI with the link http://<phone-ip-addr>/ringtone[1|2][?<url>], where <url> syntax is [[tftp|http|https]://][host[:port]]/<pathname>. TFTP, HTTP, and secure HTTP are supported.

`Example:`

If the phone's IP address is 192.168.2.1, to download the ring tone "music.mid" residing on the HTTP server 192.168.2.100, and store it as "ringtone2," the user would issue the following link on a web browser connected to the same LAN as the phone: http://192.168.2.1/ringtone2?http://192.168.2.100/music.mid.

Q. What ring tone formats are supported?

A. Table 1 shows the association of ring tone suffix to ring tone format.

Table 1.   Ring Tone Formats Supported by the Cisco SPA504G

Ring Tone Format	Ring Tone Suffix
G.726_32	.726

Q. How can the firmware be upgraded?

A. The firmware can be upgraded in any of the following ways:

Remotely: An IP telephony service provider (ITSP) can upgrade the firmware remotely from an HTTP server or by using a profile for the phone.

By downloading .exe firmware and executing it locally on a PC.

For details, see the SPA504G user guide: http://www.cisco.com/en/US/products/ps10033/products_user_guide_list.html.

Note: In SPCP mode, firmware upgrades for the phones will be initiated by the administrator managing the Cisco Unified Communications 500.

Q. What are the display specifications for the Cisco SPA504G?

A. Backlit pixel base, 3.0-inch diagonal screen with 128 x 64 resolution.

Q. Does the Cisco SPA504G support personalized wallpaper?

A. Yes, users can select personalized wallpaper via HTTP refresh or from a TFTP server application. Users can also configure the phone's background display to be a text logo via the phone's Web GUI.

Q. Does the Cisco SPA504G support embedded Bluetooth?

A. No, it does not support integrated Bluetooth. The Cisco SPA 525G supports this feature.

Q. What standards does the Cisco SPA504G meet?

A. The SPA504G meets the following standards:

- Electromagnetic compatibility (EMC)
  - FCC/CFR 47 part 15 class B
  - ICES-003 class B
  - EN55022 class B

- ◦ AS/NZS 3548 class B
- ◦ CISPR 22 class B
- ◦ EN 55024
- ◦ EN 300.328
- ◦ EN 301.489-1
- ◦ EN 301.489-17
- Safety
  - ◦ UL 60950
  - ◦ IEC/EN 60950
  - ◦ CSA 22.2 60950
  - ◦ ACA TS 001
- Hearing aid compatibility (HAC)
  - ◦ FCC parts 68.316 and 68.317
  - ◦ PT220 (New Zealand)

Q. Does the Cisco SPA504G comply with the Restriction of Hazardous Substances (RoHS) standards?
A. Yes.

Q. Where can I learn more about the Cisco SPA504G?
A. For more information, visit http://www.cisco.com/go/500phones.
