

Announcing First Customer Shipment of Cisco Unified Attendant Console Business Edition Version 9.1.1 - Now with 64-Bit Server

PB728583

Cisco® Unified Attendant Console Business Edition Version 9.1.1 is available globally for first customer shipment (FCS).

Cisco Unified Attendant Console Business Edition is a feature-rich attendant console designed specifically for the growing Cisco Unified Communications Manager customer with a maximum of 500 IP phones and 12 operators concurrently logged in. Version 9.1.1 of Cisco Unified Attendant Console Business Edition is supported with Cisco Unified Communications Manager Versions 7.1(5) through 9.1(1).

To download the software and register for a free 60-day evaluation license, visit <http://www.cisco.com/go/ac>.

New Features

Cisco Unified Attendant Console Business Edition Version 9.1.1 is a minor release but includes the following significant functions:

- 64-bit server: Run the Cisco Unified Attendant Console server on Microsoft Windows Server 2008 R2.
- Retain directory search during call-control event: Not sure if the call you transferred was answered? Enabling directory search retention allows you to keep an eye on a transferred call or quickly locate an alternate number when interacting with other calls.
- Server-based console preferences: Many of your attendant console client preferences can now follow you to a different PC running Cisco Unified Attendant Console.
- Configurable forced delivery timer per queue: When forced delivery is enabled for a queue, you can now specify how long you want the call to ring on an operator's handset before the call is sent to the next available operator handset.
- Call park retrieval by other operators: You can now use the attendant console client to retrieve calls parked by other operators.

Upgrade Paths

Cisco Unified Attendant Console Business Edition Version 9.1.1 is a minor upgrade and therefore available at no additional charge to all customers with a valid Essential Software (ESW) contract.

Ordering Information

You must order a Cisco Unified Attendant Console Business Edition license for each concurrent operator login. A maximum of 12 concurrent operator client logins are supported per Cisco Unified Attendant Console Business Edition server. Example: If you need 12 attendant consoles logged into the server at the same time, you should order 12 licenses. Refer to Table 1 for part numbers.

You can launch the Cisco Unified Attendant Console Business Edition Version 9.1.1 configuration in Cisco Commerce Workspace with one of the following SKUs:

- For electronic delivery of the license activation codes: L-CUAC9X-ATT-CON
- For physical delivery of the license activation codes: CUAC9X-ATT-CON

Table 1. Ordering Information
