July 2013

Executive Corner

Security Solutions Keynote at Cisco Live Orlando

Rapid changes in the world around us, driven by cloud, mobility, and the Internet of Everything, are creating significant opportunities for global organizations. These environmental changes also bring challenges: The sophistication with which cyber threats and attacks are carried out continues to grow rapidly, and attackers are increasingly able to circumvent traditional security systems. Countering these intelligent adversaries to protect our networks and our data centers requires an integrated security approach, more advanced security techniques and technologies, and an investment in governance to prepare our people and innovations.

Christopher Young, Senior Vice President for Security and Government, Cisco

Join Christopher Young for a discussion on the evolving threat landscape and how Cisco is leading the way with an integrated security architecture that supports the growth and evolution of our customers' businesses. View video
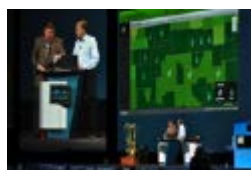

Sales Updates

See ISE in Action and Win

There is no better way to understand the power of the Cisco Identity Services Engine than to see it in action. Join us every Wednesday at 8:30 a.m. PT for a live demonstration and Q&A about onboarding BYOD devices using ISE. It's easy to attend: Simply visit www.cisco.com/go/ise, scroll down to "Live Demos," and select the session that works best for you. And when you complete the survey at the close of your demo, you may be eligible to win a $3000 learning credit.

Bringing the Internet of Everything to Life

John Chambers, Cisco Chairman and CEO, and Jim Grubb, Cisco Chief Demonstration Officer, demonstrated the value that the Internet of Everything can bring to Cisco's partners. Take a look back at the Cisco Partner Summit 2013.

Customer Story of the Month

Texas Heart Institute Safeguards Patient Data Using Context-Aware Security

The Texas Heart Institute (THI) is ranked among the top 10 cardiovascular centers in the United States by *U.S. News & World Report*. It is part of Texas Medical Center, the world's largest medical complex, and is a core lab for other medical center institutes. Data security is paramount.

A Cisco® ASA 5585-X Next-Generation Firewall gives THI administrators unprecedented visibility into network traffic flow. Staff can make more informed decisions regarding access, including social media use. The security solution helps THI protect 10,000 student athletes participating in cardiovascular screenings.

THI's Cisco solution also includes Cisco AnyConnect®, Cisco AnyConnect Mobile, Cisco Prime™ Security Manager, and the SSL VPN function of the ASA firewall.
