★ NETWORK MANAGEMENT PRODUCT OF THE YEAR

WINNER: MPLS DIAGNOSTICS EXPERT - CISCO

Cisco are delighted to accept the "Network Management Product of the Year" award, for our innovative Cisco MPLS Diagnostics Expert product. Being a "Reader's award", coupled with winning this same award in 2008, reflects well on the continued success of this product in demanding customer environments.

A member of our widely deployed Cisco IP Solution Center product family, Cisco MPLS Diagnostics Expert helps Network Operations Center (NOC) staff rapidly troubleshoot and diagnose outages in MPLS (Multi-Protocol Label Switching) networks. Used by both enterprise and service provider customers across the world, Cisco MPLS Diagnostics Expert is unique in a number of regards - in particular in terms of the advanced networking intellectual property that is automatically executed, and the ease of use that make this product usable by entry level NOC staff, freeing more senior staff for more strategic work. For more information on Cisco's MPLS management tools, see www.cisco.com/go/mde, www.cisco.com/go/isc or <mailto:mpls-diagnostics-expert@cisco.com>
