

Cisco Connecting Sichuan Initiative

Owen Chan

Cisco's commitment is broad and long-standing. Our focus areas in China includes Corporate Social Responsibility.

Liu Cong (English subtitled)

In the past two years we have implemented technology in 18 schools one of them a university. There are over 400 multi-media classrooms which are all connected via Internet and provide quality education for students as well as a resource for teachers' training

Li Xiao Ming (English subtitled)

Urban education resources can be shared through the platform Cisco has constructed for us facilitating virtual education in rural schools.

Ling Dao Ming (English subtitled)

Cisco has not only provided us with equipment but also with conceptual advancements in education.

Gan Hua Ping (English subtitled)

The program has accelerated its implementation in the second year, such as the smart connected building in Wenchuan People's Hospital, Deyang healthcare data center, the hardware and software are both ready and installed.

Li Zhi Xin (English subtitled)

The execution of this program in Wenchuan has raised the overall standard of management of our healthcare systems, particularly Cisco focuses largely on long-term sustainability of the program.

Wang Song Bai (English subtitled)

Connecting Sichuan's mobile clinic provides a solution for remote healthcare access helping farmers in distant mountainous regions to receive proper care.

Zhou Li (English subtitled)

The Cisco staff donated winter clothes and took our confined students for an outing on Children's Day these activities were very heart-warming and appreciated by the children. It helped them recover their confidence and hope through such supportive and caring help.

Owen Chan

Our giving to the Sichuan communities does not only involve technology, but also our loving heart to all people in Sichuan.
