

Cisco Visual Networking Index (VNI)

Global IP Traffic Forecast 2009–2014

With North America Highlights

Cisco Visual Networking Index (VNI)

Expanding the scope of Cisco's IP Thought Leadership

The **Cisco VNI Global Forecast** methodology relies upon various independent analyst forecasts as well as fixed and mobile data usage surveys.

Global Forecast Data

Global Usage Trends

Region/country data modeling with consumer/business usage trends.

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

Global IP Traffic Growth

IP traffic will increase 4.3 fold from 2009–2014

In 2014, global IP traffic will reach 3/4 of a zettabyte

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

North America IP Traffic Growth

IP traffic will increase 3.7 fold from 2009–2014

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

North America will generate the most IP traffic by 2014
19 exabytes/month by 2014, 30% CAGR, 3.7X growth

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009-2014

Latin America will be the fastest growing traffic region
3.5 exabytes/month by 2014, 51% CAGR, 7.9X growth

Global Consumer VoD Mix

VoD traffic driven by growth of HD

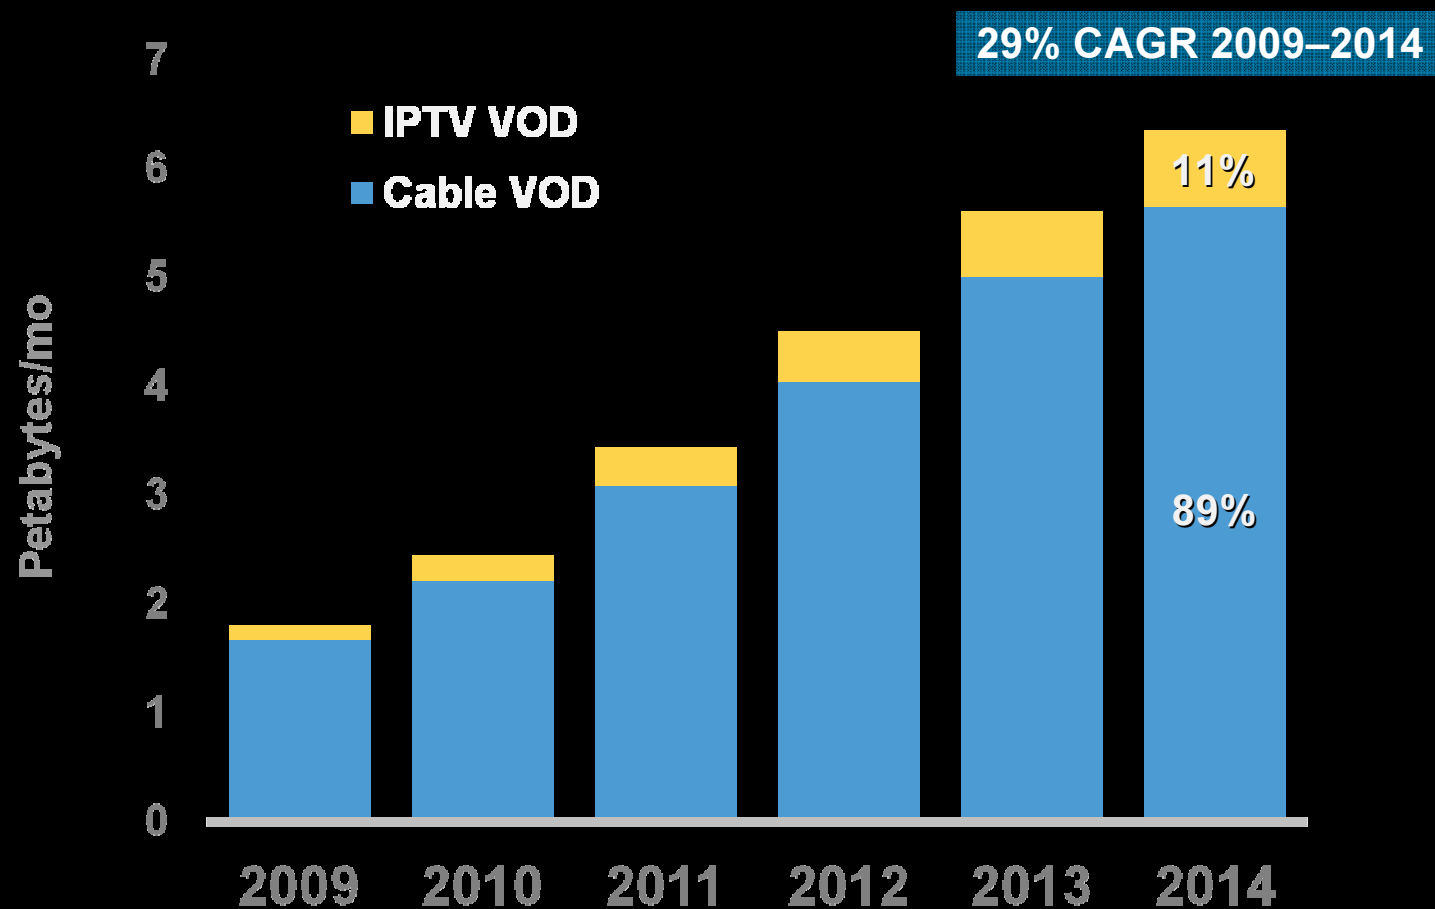

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

North America Consumer VoD Mix

VoD traffic driven by growth of HD

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

If all video minutes were 3D in 2014, the video forecast would be 3X higher (from 38 EB to 111 EB per month).

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

Global Business IP Traffic

Business IP to grow at a CAGR of 21%

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

Web-based video conferencing is the fastest growing business sub-category; reaching 180-fold by 2014.

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

North America web-based video conferencing is the fastest growing business sub-category; reaching 93-fold growth by 2014.

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

Global Mobile Data Traffic Growth

Mobile data traffic will increase 39 fold from 2009 to 2014

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

North America Mobile Data Traffic Growth

Mobile data traffic will increase 48 fold from 2009 to 2014

* Mobile Gaming and VoIP contribute less than 2% in 2014.

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

Global mobile data traffic is growing 3.2 times faster than fixed data traffic.

Source: Cisco Visual Networking Index (VNI) Global Forecast, 2009–2014

Cisco VNI Forecast Update: 2009–2014

Summary / Key Highlights

Total IP Traffic

63.9 Exabytes per month by 2014

- Annual global IP traffic will reach 3/4 of a zettabyte by 2014

Internet

47.2 Exabytes per month by 2014

- Internet video will surpass P2P as top traffic type by end of 2010

Managed IP

13.2 Exabytes per month by 2014

- Web-based video conferencing will grow 180-fold from 2009-2014

Mobile Data

3.5 Exabytes per month by 2014

- Mobile video will increase 66-fold from 2009 to 2014
