Integration Brokerage Technology Group

January 2014

Challenges for Next-Generation Enterprises

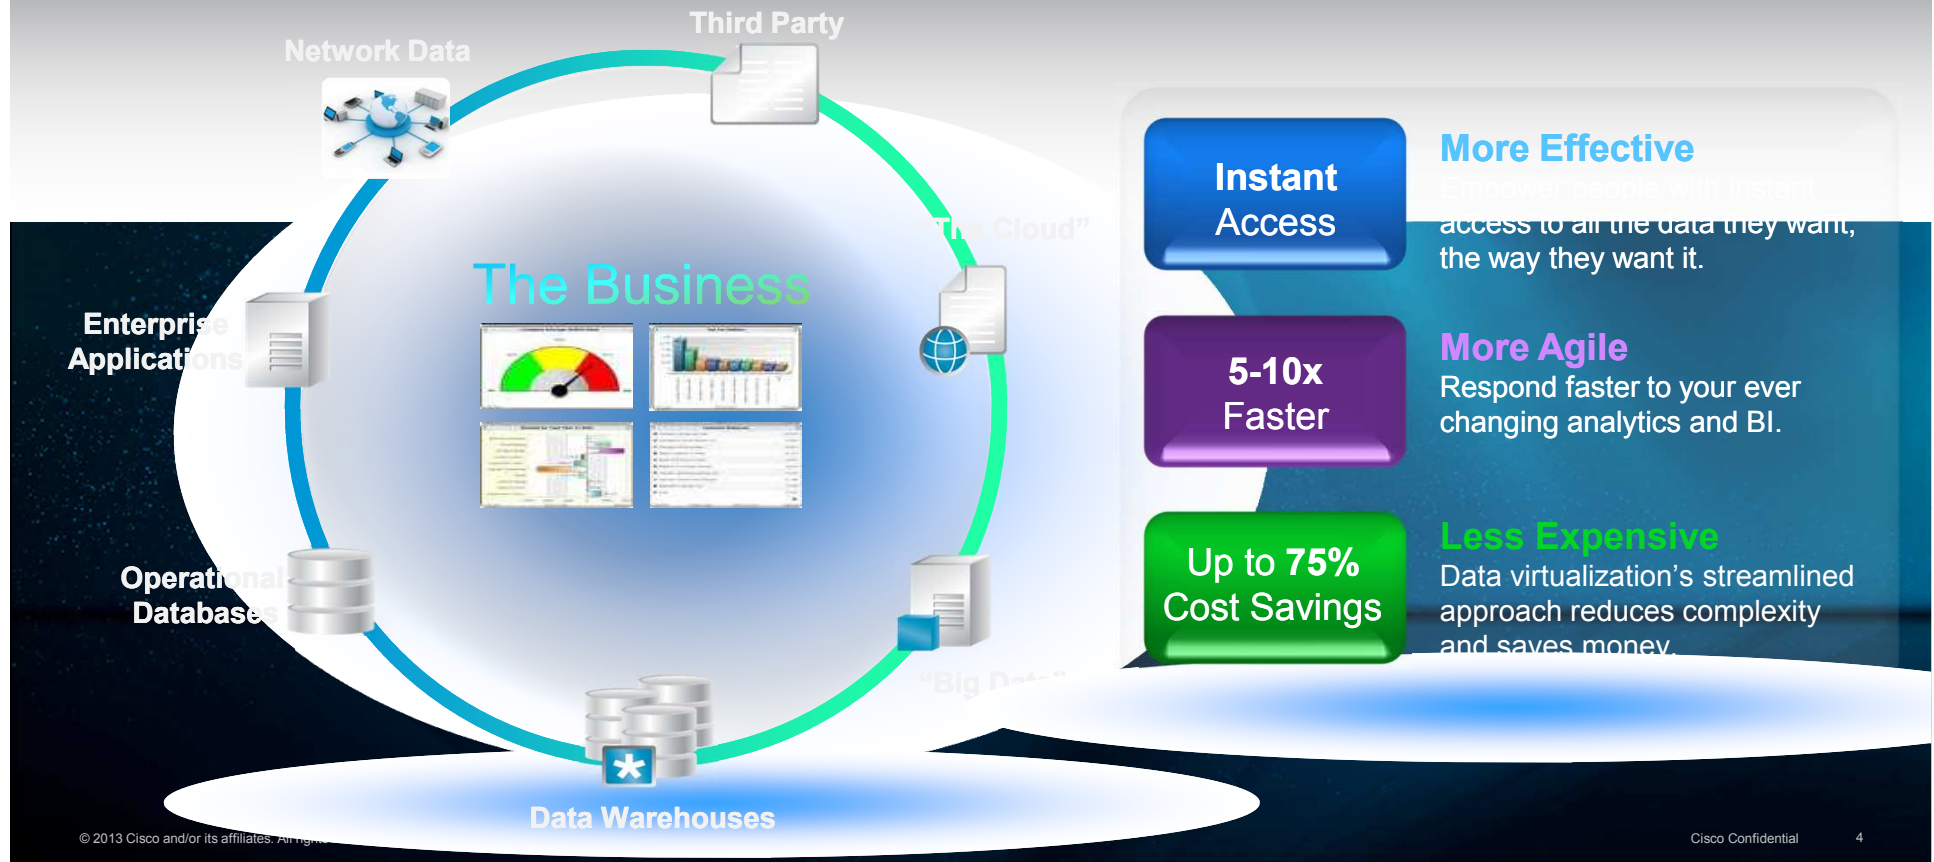

Cisco Solutions Help Deliver on Business Outcomes

Cisco Data Virtualization

Access Data from Multiple Sources and Formats

Why Cisco?

Network Intelligence and Programmability

Cloud

Big Data

Distributed Data
(IoE)

The Network is Emerging as the Central Nervous System For Business in Today's Hyper-connected World.

Cisco ServiceGrid

The Power of Seamless Multi-Party Integration

No Automation

Manual Information Sharing

- Manual communications
- High manual efforts
- Inaccurate Data exchange
- High chance of multiple case entries

Custom Development

Individual Connections

- No standardization, not scalable
- Time-consuming implementation
- Costly and complicated changes
- Lack of visibility about Service Levels
- No consistent view of the processes

ServiceGrid

Connect Once – Connect All

- Quick integration of multiple sources
- One central integration platform
- Seamless and automated processes
- Consistent service level management
- Vendor governance

Complete Visibility Across Your Ecosystem

End-to-End SLA Governance

SLA Management

Customers

Providers

Real-time Visibility

Captures state and status of every case in the ecosystem

Multi-Party Governance

SLA management by vendor, customer and to specific workflows

Single Point of Control

View status, conformance and accrued violations at any time

TOMORROW starts here.
