VoIP (VoIP over Internet Protocol)

VoIP Description

Integrated VoIP is an audio feature that sends the audio from a Meeting over the Internet, instead of through the telephone. It is woven into the Meeting experience, with hosts being able to mute and un-mute attendees, pass the microphones, and start and stop VoIP. If you have speakers or headphones attached to your computer, a computer microphone, and a duplex sound card, you can choose Integrated VoIP instead of traditional telephone based teleconferencing. VoIP is best used when:

- There will be a large number of attendees (up to 500).
- The Meeting does not require much attendee participation. For example, a presentation of material, rather than a discussion.
- Attendees do not have access to a dial-in number.

VoIP Offering

- Subscriber is entitled to an unlimited number of VoIP minutes per month per license.
- Up to 500 attendees may have access to VoIP in a single Meeting.
- VoIP supports up to 7 active microphones, which may be passed to any attendee requiring speaking privileges.
- VoIP is not available in all countries. Regulatory issues in certain markets may limit or restrict use of VoIP. Contact your sales representative for further information. If the Service is ordered but is limited or restricted in the end-customer's market, this product will not be provisioned as part of the service.

Storage Description Offering and Overage

This storage offer provides 50 GB of storage aggregated across all users ("Storage"). Storage is used for storing files automatically and accessing at a later date. Committed "Add-on Storage" is additional storage purchased by Subscriber, which is in excess of the included Storage. Committed Add-on Storage may be available through your Cisco Authorized Reseller. Student Meeting Center accounts do not include Storage.

"Overage Storage" is Storage used in excess of the included Storage and purchased Add-on Storage. The Overage Storage option is enabled upon execution of an order form through Cisco WebEx. If you do not purchase the Overage Storage option, usage will be limited to the committed purchases.

Compliance Review

Cisco WebEx will have the right, upon reasonable notice, to audit Subscriber's records during normal business hours to ensure Subscriber's compliance with the above requirements. Cisco WebEx will pay the cost of the audit unless it is found that Subscriber is misusing the Service by, for example, sharing an account among multiple Employees and/or Students, providing an account to a non-Employee and/or a Non-Student, or misrepresenting the total number of Employees.
