**Section 1194.22: Web-based Internet information and applications - Detail
Voluntary Product Accessibility Template**

Management Center for Cisco Security Agents V5.0.0.0.176 Tool

Criteria	Supporting Features	Remarks and Explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Does Not Support	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	There are not multimedia presentations available in this product.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Does Not Support	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	Do not use server side images.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Supports	
(g) Row and column headers shall be identified for data tables.	Does Not Support	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Does Not Support	
(i) Frames shall be titled with text that facilitates frame identification and navigation	Supports	

(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports	In certain circumstances the Generate Rule underline will flash, but this is a very small portion of the screen and not a common occurrence.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Does Not Support	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Does Not Support	The main navigation is dependent on JavaScript. The application must have JavaScript on for overall usage.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Not Applicable	Within the application there is no usage of applets.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Does Not Support	
(o) A method shall be provided that permits users to skip repetitive navigation links.	Does Not Support	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Supports	

Section 1194.41: Information, Documentation and Support - Detail Voluntary Product Accessibility Template

Management Center for Cisco Security Agents V5.0.0.0.176 Tool

Criteria	Supporting Features	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supports	
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports
