

## Cisco Certified Refurbished Equipment—Disclaimer Notification

Some or all of the Cisco products quoted on this proposal or invoice are Cisco Certified Refurbished Equipment (CCRE) products. CCRE is Cisco equipment that has been acquired through Cisco's reverse logistics, stock rotations, demo returns, overstocks and other situational opportunities and is available for resale through Cisco's authorized channel partners.

CCRE, **while not “new”**, has been remanufactured to meet original product specifications and its IOS, if applicable based on Cisco specifications, has been upgraded to the latest shippable release. Cisco provides a warranty for CCRE that is identical to that of corresponding new Cisco equipment and CCRE is automatically eligible for Cisco SMARTnet support. All CCRE part numbers include the extension “RF” to help customers clearly identify each product as CCRE equipment.

In the resale, if applicable, of any CCRE, Purchasers (i) must not remove any label or other markings provided by Cisco with such products that refer to the CCRE as used or refurbished, or part of the "Cisco Remarketing Program"; (ii) must not in any case hold any CCRE out to be, or in circumstances where any authorized channel partner and/or end user might reasonably believe them to be, new Products; and (iii) must promptly notify Cisco in the event the Purchaser becomes aware that any Cisco authorized channel partner or any other person to which an Cisco authorized channel partner has sold or transferred CCRE, has (a) removed any label or other markings provided by Cisco with such products that refer to the CCRE as used or refurbished; or (b) advertised, promoted, or resold any CCRE as new or unused.

For additional information about CCRE products, please contact your Cisco account manager or visit [www.cisco.com/go/ccre](http://www.cisco.com/go/ccre).
