Harness the Power of Your Network

Cisco Network Optimization Service Helps Build Tomorrow's Network

Today's pace of innovation means your network can't stand still. Network optimization services are key to getting greater return from your investment and preparing to capitalize on tomorrow's big opportunities.

### The Before & After of Network Optimization

Increase Productivity and Reduce Cost

Before:

Network support from multiple parties was inefficient and costly.

After:

$5 MILLION IN SAVINGS

The ability to troubleshoot issues more quickly resulted in an estimated cost savings in excess of $5 million.

People

Cisco support engineers with expert knowledge, proven practices, and the latest smart tools helped California Courts streamline its support needs.

> " Maintenance and optimization are no longer being sacrificed, and the courts don't have to pay an integrator for consulting time every time they need help with network issues and projects. "

~Raul Ortega, Information Security Officer,
Administrative Office of the Courts

Leave Downtime in the Dust

Before:

UPTIME ?

Existing technology infrastructure was unable to meet growing security and connectivity needs.

After:

100% UPTIME[1]

Users and devices enjoy a secure connection with 100% uptime.[1]

How It Happened

Process

Cisco Services provided deep expertise in helping Sligro deploy new network and data centers in just one weekend, improving, rather than disrupting, business continuity.

"By deploying a Cisco infrastructure, we not only gain an extremely reliable network; we also have a foundation we can build on."

*~Maurice van Veghel, Chief Information Officer, Sligro*

Do More and Do It Better

Before:

A best-effort patchwork of IT systems makes it difficult to stay productive and grow.

After:

Location A

Location B

Location C

A single, standardized infrastructure helped Ecobank deploy IT systems in new locations and reduce time to market by ten months.

How It Happened

Click to find out.

Flexibility

When Cisco engineers saw the need for a new approach, Ecobank was able to shift their IT priorities and implement a more stable, agile infrastructure aligned with design standards and proven strategies.
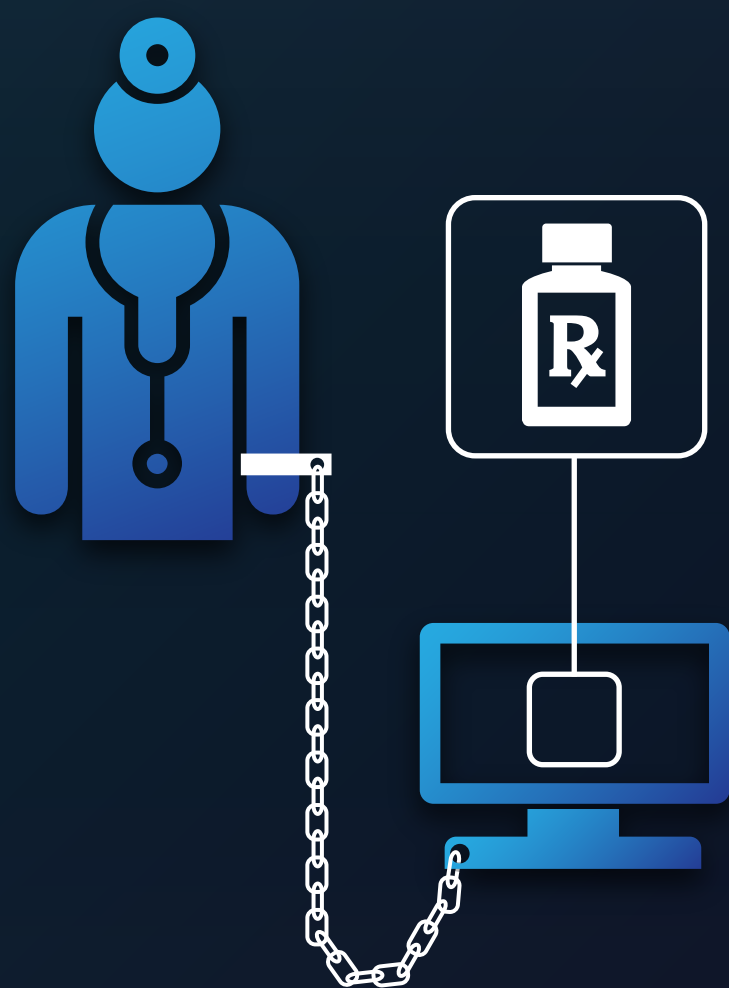

"This has helped us to cut the time it takes to enter a new market from a year to just two months.

*~Tunji Alabi, Group Head for Technology Infrastructure, Ecobank*

Deliver a Better Customer Experience Securely

Before:

The move from desktops to mobile devices required an entirely new security strategy.

After:

Physicians enjoy 24-hour access to vital network resources and private information remains secure even while extending Internet access to patients and guests.

How It Happened

Tools

Cisco smart technology allowed Sentara to smoothly implement hospital-wide device and user security policies.

> " We know we can count on Cisco professional services as we deploy new networked technologies to deliver superior healthcare. "

~Chad Spiers, Director,
Voice and Data Infrastructure Services, Sentara

The Cisco Optimization Advantage »»»»

Cisco Network Optimization Service works to your advantage because of:

People
Tenured Cisco experts, plus more than 280,000 worldwide partner employees, offer end-to-end support.

Process
Proven best practices and unsurpassed knowledge in architecture, design, validation, implementation, and operations ensure you get the most out of your network.

Flexibility
Customize your service plan and refocus resources to fit new needs as priorities change.

Tools
Smart service capabilities such as automation, analysis, and knowledge-base access deliver greater visibility and proactive insights that help you make better decisions more quickly.

Position your enterprise for success today and tomorrow with Cisco Network Optimization Services—comprehensive, proactive, end-to-end support for cost savings and peak performance.
