

Cisco Technology Happy Hour Series Webcast

“Cyber Ready” Network Infrastructure

Please join Cisco for a 60-minute technical training webcast on “Cyber Ready” Network Infrastructure.

Do you have network situational awareness?

Are you prepared to enable specific features within your Network Operating Systems to better enable a Common Operational Picture?

Does your network have the technologies in place for a “cyber ready” network infrastructure?

On December 13, you will learn about the specific features that are embedded within Cisco products that need to be enabled within your network today to best utilize technologies you already own and be positioned for new technologies being developed to help with common cyber-related problems.

This session will cover:

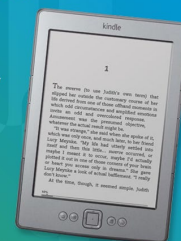

- Technologies such as NBAR
- Different versions of NetFlow
- Application Visibility and Control
- Identity-based Firewalling
- Access Control technologies

We look forward to your participation on **December 13**.

Tuesday, December 13
10 a.m. PT / 1 p.m. ET

Webcast details provided
upon registration.

All attendees
have the
opportunity
to win **gift
cards** and
participate
in our raffle for an
Amazon Kindle.

Register today.
