Experience the Power of Project Workplace at Any Time

The Project Workplace app is optimized for use on the Apple iPad. You can install the app on your iPad and then use it at any time. Internet connectivity will not be needed. The Chrome and Safari browsers on PCs running Windows and OS X will automatically download the application for offline usage once someone has used Project Workplace at least one time.

Add the Project Workplace App to your home screen

1 Type **cisco.com/go/projectworkplace** in the address field in Safari and launch the Project Workplace tool.

cisco.com/go/projectworkplace ↻

2 Tap the **Share icon** (a box with an arrow coming out of it) to the left of the address field.

cisco.com/assets/

3 Tap the **Add to home screen** button.

cisco.com/assets/

Add to
Home screen

4 Click **Add.**

cisco.com/assets/

Cancel   Add to Home   **Add**

Cisco PWP

cisco.com/assets/sol/tp/pr...

An icon will be added to your home screen so you can quickly access this website.

5 The Project Workplace app is now installed on your tablet.
